STATEMENT OF ADDITIONAL INFORMATION

Dated September 13, 2024

This Statement of Additional Information (“SAI”) is not a prospectus. It should be read in conjunction with the current prospectus for the Funds dated September 13, 2024, as it may be supplemented or revised from time to time. This SAI is incorporated by reference into the Funds’ prospectus. You can obtain a free copy of the annual and semi-annual reports (once available), prospectus and SAI by writing to the Funds, 8730 Stony Point Parkway, Suite 205, Richmond, Virginia 23235, by calling the Funds toll free at 833-759-6110 or by e-mail at: mail@ccofva.com. The Funds’ annual and semi-annual reports (once available), prospectus and SAI are all available for viewing/downloading at www.rexshares.com. General inquiries regarding the Funds may also be directed to the above address or telephone number.

THE TRUST

General. This SAI relates to the T-Rex 2X Long MSTR Daily Target ETF and T-Rex 2X Inverse MSTR Daily Target ETF (each, a “Fund” and collectively, the “Funds”) and should be read in conjunction with the prospectus of the Funds. This SAI is incorporated by reference into the Funds’ prospectus. No investment in shares should be made without reading the prospectus. Each Fund is a non-diversified series of ETF Opportunities Trust, a Delaware statutory trust (the “Trust”). The Trust is registered as an open-end management investment company. The Trust is governed by its Board of Trustees (the “Board” or “Trustees”). The investment adviser to the Funds is Tuttle Capital Management, LLC (the “Adviser”).

Each Fund may issue an unlimited number of shares of beneficial interest (“Shares”). All Shares have equal rights and privileges. Each Share is entitled to one vote on all matters as to which Shares are entitled to vote. In addition, each Share is entitled to participate equally with other Shares (i) in dividends and distributions declared by the Funds and (ii) on liquidation to its proportionate share of the assets remaining after satisfaction of outstanding liabilities. Shares are fully paid, non-assessable and fully transferable when issued and have no pre-emptive, conversion or exchange rights. Fractional Shares have proportionately the same rights, including voting rights, as are provided for a full Share.

Each Fund will issue and redeem Shares at net asset value (“NAV”) in aggregations of at least 10,000 Shares (each a “Creation Unit”). The Funds will issue and redeem Creation Units principally for cash. The Funds reserve the right to offer creations and redemptions of Shares in exchange for a basket of securities (the “Deposit Securities”), together with the deposit of a specified cash payment (the “Cash Component”), plus a transaction fee. Each Fund is listed on a national securities exchange (the “Exchange”) as set forth below.

Fund	Ticker	Principal U.S. Listing Exchange
T-REX 2X LONG MSTR DAILY TARGET ETF	MSTU	Cboe BZX Exchange, Inc.
T-REX 2X INVERSE MSTR DAILY TARGET ETF	MSTZ	Cboe BZX Exchange, Inc.

Shares will trade on the Exchange at market prices that may be below, at, or above NAV. In the event of the liquidation of either Fund, a share split, reverse split or the like, the Trust may revise the number of Shares in a Creation Unit.

Shares may be issued in advance of receipt of Deposit Securities subject to various conditions as described herein - see the section titled “Placement of Creation Orders Outside the Clearing Process” of this SAI. In each instance of such cash creations or redemptions, transaction fees may be imposed and may be higher than the transaction fees associated with in-kind creations or redemptions. See “Additional Information About Purchases and Sales” below.

ADDITIONAL INFORMATION ABOUT INVESTMENT OBJECTIVES AND POLICIES

Each Fund’s investment objective and principal investment strategies are described in the prospectus. Each Fund is “non-diversified” as that term is defined in the Investment Company Act of 1940, as amended (the “1940 Act”). As a non-diversified fund, each Fund is permitted to invest in fewer securities at any one time than a diversified fund. The following information supplements, and should be read in conjunction with, the prospectus. For a description of certain permitted investments discussed below, see “Description of Permitted Investments” in this SAI.

Portfolio Turnover. Average annual portfolio turnover rate is the ratio of the lesser of sales or purchases to the monthly average value of the portfolio securities owned during the year, excluding from both the numerator and the denominator all securities with maturities at the time of acquisition of one year or less. A higher portfolio turnover rate involves greater transaction expenses to the Fund and may result in the realization of net capital gains, which would be taxable to shareholders when distributed. As of the date of this Prospectus, the Funds have not yet commenced operations and therefore do not have any portfolio turnover information available.

INVESTMENT STRATEGIES, POLICIES AND RISKS

The following discussion of investment techniques and instruments supplements, and should be read in conjunction with, the investment information in the Funds' prospectus. In seeking to meet its investment objective, the Funds may invest in any type of security whose characteristics are consistent with its investment programs. To the extent particular investment techniques or instruments that are not described in the Principal Investment Strategies disclosure of the Funds' prospectus, such investment techniques and instruments are not a part of the principal strategies and the corresponding risks are not principal risks of the Funds.

Principal Investment Strategies, Policies And Risks

Swaps. Each Fund may enter into total return swaps, which may be used either as economically similar substitutes for owning the reference asset specified in the swap, such as the securities that comprise a given market index, particular securities or commodities, or other assets or indicators. They also may be used as a means of obtaining exposure in markets where the reference asset is unavailable or it may otherwise be impossible or impracticable for a Fund to own that asset. "Total return" refers to the payment (or receipt) of the total return on the underlying reference asset, which is then exchanged for the receipt (or payment) of an interest rate. Total return swaps provide a Fund with the additional flexibility of gaining exposure to a market or sector index in a potentially more economical way.

Most swaps entered into by a Fund provide for the calculation and settlement of the obligations of the parties to the agreement on a "net basis" with a single payment. Consequently, a Fund's current obligations (or rights) under a swap will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount"). Other swaps may require initial premium (discount) payments as well as periodic payments (receipts) related to the interest leg of the swap or to the return on the reference entity. A Fund's current obligations under the types of swaps that the Funds expect to enter into (e.g., total return swaps) will be accrued daily (offset against any amounts owed to a Fund by the counterparty to the swap) and any accrued but unpaid net amounts owed to a swap counterparty will collateralized by the Fund posting collateral to a tri-party account between the Fund's custodian, the Fund, and the counterparty. However, typically no payments will be made until the settlement date.

Swap agreements do not involve the delivery of securities or other underlying assets. Accordingly, if a swap is entered into on a net basis and if the counterparty to a swap agreement defaults, a Fund's risk of loss consists of the net amount of payments that the Fund is contractually entitled to receive, if any.

In recent years, regulators across the globe, including the U.S. Commodity Futures Trading Commission ("CFTC") and the U.S. banking regulators, have adopted collateral requirements applicable to uncleared swaps. While a Fund is not directly subject to these requirements, where a Fund's counterparty is subject to the requirements, uncleared swaps between a Fund and that counterparty are required to be marked-to-market on a daily basis, and collateral is required to be exchanged to account for any changes in the value of such swaps. The rules impose a number of

requirements as to these exchanges of collateral, including as to the timing of transfers, the type of collateral (and valuations for such collateral) and other matters that may be different than what a Fund would agree with its counterparty in the absence of such regulation. In all events, where a Fund is required to post collateral to its swap counterparty, such collateral will be posted to an independent bank custodian, where access to the collateral by the swap counterparty will generally not be permitted unless a Fund is in default on its obligations to the swap counterparty.

In addition to the variation margin requirements, regulators have adopted “initial” margin requirements applicable to uncleared swaps. Where applicable, these rules require parties to an uncleared swap to post, to a custodian that is independent from the parties to the swap, collateral (in addition to any variation margin noted above) in an amount that is either (i) specified in a schedule in the rules or (ii) calculated by the regulated party in accordance with a model that has been approved by that party’s regulator(s). Effective September 1, 2022, the initial margin rules will apply to the swap trading relationships of Funds with average aggregate notional amounts that exceed \$8 billion. These rules may impose significant costs on a Fund’s ability to engage in uncleared swaps and, as such, could adversely affect the Advisor’s ability to manage a Fund, may impair a Fund’s ability to achieve its investment objective and/or may result in reduced returns to a Fund’s investors.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”) and related regulatory developments have imposed comprehensive new regulatory requirements on swaps and swap market participants. The regulatory framework includes: (1) registration and regulation of swap dealers and major swap participants; (2) requiring central clearing and execution of standardized swaps; (3) imposing collateral requirements on Swap transactions; (4) regulating and monitoring swap transactions through position limits and large trader reporting requirements; and (5) imposing recordkeeping and centralized and public reporting requirements, on an anonymous basis, for most swaps. The CFTC is responsible for the regulation of most swaps. The SEC has jurisdiction over a small segment of the market referred to as “security-based swaps,” which includes swaps on single securities or credits, or narrow-based indices of securities or credits.

Uncleared swaps. In an uncleared swap, the swap counterparty is typically a brokerage firm, bank or other financial institution. A Fund customarily enters into uncleared swaps based on the standard terms and conditions of an International Swaps and Derivatives Association (“ISDA”) Master Agreement. ISDA is a voluntary industry association of participants in the OTC derivatives markets that has developed standardized contracts used by such participants that have agreed to be bound by such standardized contracts. In the event that one party to a swap transaction defaults and the transaction is terminated prior to its scheduled termination date, one of the parties may be required to make an early termination payment to the other. An early termination payment may be payable by either the defaulting or nondefaulting party, depending upon which of them is “in-the-money” with respect to the swap at the time of its termination. Early termination payments may be calculated in various ways, but are intended to approximate the amount the “in-the-money” party would have to pay to replace the swap as of the date of its termination. During the term of an uncleared swap, a Fund will be required to pledge to the swap counterparty, from time to time, an amount of cash and/or other assets equal to the total net amount (if any) that would be payable by a Fund to the counterparty if all outstanding swaps between the parties were terminated on the date in question, including any early termination payments. Periodically, changes in the amount pledged are made to recognize changes in value of the contract resulting from, among other things, interest on the notional value of the contract, market value changes in the underlying investment, and/or dividends paid by the issuer of the underlying instrument. Likewise, the counterparty will be required to pledge cash or other assets to cover its obligations to a Fund. However, the amount pledged may not always be equal to or more than the amount due to the other party. Therefore, if a counterparty defaults in its obligations to a Fund, the amount pledged by the counterparty and available to a Fund may not be sufficient to cover all the amounts due to a Fund and the Fund may sustain a loss. Rules requiring initial margin to be posted by certain market participants for uncleared swaps have been adopted and are being phased in over time. When these rules take effect with respect to the Funds, if a Fund is deemed to

have material swaps exposure under applicable swap regulations, it will be required to post initial margin in addition to variation margin.

Cleared swaps. Certain standardized swaps are subject to mandatory central clearing and exchange-trading. The Dodd-Frank Act and implementing rules will ultimately require the clearing and exchange-trading of many swaps. Mandatory exchange-trading and clearing will occur on a phased-in basis based on the type of market participant, CFTC approval of contracts for central clearing and public trading facilities making such cleared swaps available to trade. To date, the CFTC has designated only certain of the most common types of credit default index swaps and interest rate swaps as subject to mandatory clearing and certain public trading facilities have made certain of those cleared swaps available to trade, but it is expected that additional categories of swaps will in the future be designated as subject to mandatory clearing and trade execution requirements. Central clearing is intended to reduce counterparty credit risk and increase liquidity, but central clearing does not eliminate these risks and may involve additional costs and risks not involved with uncleared swaps. In a cleared swap, a Fund's ultimate counterparty is a central clearinghouse rather than a brokerage firm, bank or other financial institution. Cleared swaps are submitted for clearing through each party's futures commission merchant ("FCM"), which must be a member of the clearinghouse that serves as the central counterparty. Transactions executed on a swap execution facility may increase market transparency and liquidity but may require a Fund to incur increased expenses to access the same types of swaps that it has used in the past. When a Fund enters into a cleared swap, it must deliver to the central counterparty (via the FCM) initial margin. The initial margin requirements are determined by the central counterparty, and are typically calculated as an amount equal to the volatility in market value of the cleared swap over a fixed period, but an FCM may require additional collateral above the amount required by the central counterparty. During the term of the swap agreement, an additional collateral amount may also be required to be paid by a Fund or may be received by a Fund in accordance with collateral controls set for such accounts. If the value of the Fund's cleared swap declines, the Fund will be required to make additional payments to the FCM to settle the change in value. Conversely, if the market value of a Fund's position increases, the FCM will post additional amounts to the Fund's account. At the conclusion of the term of the swap agreement, if a Fund has a loss equal to or greater than the collateral amount, the collateral amount is paid to the FCM along with any loss in excess of the collateral amount. If a Fund has a loss of less than the collateral amount, the excess collateral is returned to a Fund. If a Fund has a gain, the full collateral amount and the amount of the gain is paid to a Fund.

The regulation of cleared and uncleared swaps, as well as other derivatives, is a rapidly changing area of law and is subject to modification by government and judicial action. In addition, the SEC, CFTC and the exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the implementation or reduction of speculative position limits, the implementation of higher collateral requirements, the establishment of daily price limits and the suspension of trading. It is not possible to predict fully the effects of current or future regulation. However, it is possible that developments in government regulation of various types of derivative instruments, such as speculative position limits on certain types of derivatives, or limits or restrictions on the counterparties with which a Fund engages in derivative transactions, may limit or prevent the Fund from using or limit the Fund's use of these instruments effectively as a part of its investment strategy, and could adversely affect the Fund's ability to achieve its investment goal. The Adviser will continue to monitor developments in the area, particularly to the extent regulatory changes affect a Fund's ability to enter into desired swap agreements. New requirements, even if not directly applicable to a Fund, may increase the cost of a Fund's investments and cost of doing business.

Fixed Income Investments and Cash Equivalents. Fixed income investments and cash equivalents held by the Funds may include, without limitation, the types of investments set forth below.

(1) The Funds may invest in U.S. government securities, including bills, notes and bonds differing as to maturity and rates of interest, which are either issued or guaranteed by the U.S. Treasury or by U.S. government agencies or instrumentalities. U.S. government securities include securities that are issued or guaranteed by the United States Treasury, by various agencies of the U.S. government, or by various instrumentalities that have been established or sponsored by the U.S. government. U.S. Treasury securities are backed by the “full faith and credit” of the United States. Securities issued or guaranteed by federal agencies and U.S. government-sponsored instrumentalities may or may not be backed by the full faith and credit of the United States. Some of the U.S. government agencies that issue or guarantee securities include the Export-Import Bank of the United States, the Farmers Home Administration, the Federal Housing Administration, the Maritime Administration, the Small Business Administration and the Tennessee Valley Authority. An instrumentality of the U.S. government is a government agency organized under federal charter with government supervision. Instrumentalities issuing or guaranteeing securities include, among others, the Federal Home Loan Banks, the Federal Land Banks, the Central Bank for Cooperatives, Federal Intermediate Credit Banks and Federal National Mortgage Association. In the case of those U.S. government securities not backed by the full faith and credit of the United States, the investor must look principally to the agency or instrumentality issuing or guaranteeing the security for ultimate repayment, and may not be able to assert a claim against the United States itself in the event that the agency or instrumentality does not meet its commitment. The U.S. government, its agencies and instrumentalities do not guarantee the market value of their securities, and consequently, the value of such securities may fluctuate.

(2) The Funds may invest in certificates of deposit issued against funds deposited in a bank or savings and loan association. Such certificates are for a definite period of time, earn a specified rate of return, and are normally negotiable. If such certificates of deposit are non-negotiable, they will be considered illiquid securities and be subject to the Fund’s 15% restriction on investments in illiquid securities. Pursuant to the certificate of deposit, the issuer agrees to pay the amount deposited plus interest to the bearer of the certificate on the date specified thereon. Under current FDIC regulations, the maximum insurance payable as to any one certificate of deposit is \$250,000; therefore, certificates of deposit purchased by the Funds may not be fully insured. The Funds may only invest in certificates of deposit issued by U.S. banks with at least \$1 billion in assets.

(3) The Funds may invest in bankers’ acceptances, which are short-term credit instruments used to finance commercial transactions. Generally, an acceptance is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then “accepted” by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an asset or it may be sold in the secondary market at the going rate of interest for a specific maturity.

(4) The Funds may invest in bank time deposits, which are monies kept on deposit with banks or savings and loan associations for a stated period of time at a fixed rate of interest. There may be penalties for the early withdrawal of such time deposits, in which case the yields of these investments will be reduced.

(5) The Funds may invest in commercial paper, which are short-term unsecured promissory notes, including variable rate master demand notes issued by corporations to finance their current operations. Master demand notes are direct lending arrangements between a Fund and a corporation. There is no secondary market for the notes. However, they are redeemable by a Fund at any time. The Funds’ portfolio managers will consider the financial condition of the corporation (e.g., earning power, cash flow and other liquidity ratios) and will continuously monitor the corporation’s ability to meet all of its financial obligations, because the Fund’s liquidity might be impaired if the corporation were unable to pay principal and interest on demand. The Funds may invest in commercial paper only if it has received the highest rating from at least one nationally recognized statistical rating organization or, if unrated, judged by the Adviser to be of comparable quality.

(6) The Funds may invest in shares of money market funds, as consistent with its investment objective and policies. Shares of money market funds are subject to management fees and other expenses of those funds. Therefore, investments in money market funds will cause a Fund to bear proportionately the costs incurred by the money market fund's operations. At the same time, the Funds will continue to pay its own management fees and expenses with respect to all of its assets, including any portion invested in the shares of other investment companies. It is possible for the Funds to lose money by investing in money market fund.

(7) The Funds may invest in corporate debt securities, as consistent with its investment objective and policies. Corporate debt may be rated investment-grade or below investment-grade and may carry variable or floating rates of interest. Some corporate debt securities that are rated below investment-grade generally are considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. The Funds could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due.

Cash Reserves. In seeking to achieve its investment objective, as a cash reserve, or for liquidity purposes, the Funds may invest all or part of their assets in cash or cash equivalents, which include, but are not limited to, short-term money market instruments, U.S. government securities, certificates of deposit, bankers acceptances, or repurchase agreements secured by U.S. government securities.

Illiquid Securities. In accordance with Rule 22e-4 under the 1940 Act (the "Liquidity Rule"), the Funds may hold up to 15% of its net assets in "illiquid investments." For this purpose, the term "illiquid investments" are investments that the Fund cannot reasonably be expected to be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. The Funds may, however, hold an illiquid investment if it becomes illiquid after purchase. The Funds monitor the portion of its total assets that are invested in illiquid securities on an ongoing basis in order to ensure that the value of illiquid securities held by a Fund does not exceed 15% of the Fund's net assets.

The Funds must classify each portfolio investment at least monthly into one of four liquidity categories (highly liquid, moderately liquid, less liquid and illiquid), which are defined pursuant to the Liquidity Rule. Such classification is to be made using information obtained after reasonable inquiry and taking into account relevant market, trading and investment-specific considerations. Moreover, in making such classification determinations, a Fund determines whether trading varying portions of a position in a particular portfolio investment or asset class, in sizes that a Fund would reasonably anticipate trading, is reasonably expected to significantly affect its liquidity, and if so, a Fund takes this determination into account when classifying the liquidity of that investment. The Funds may be assisted in classification determinations by one or more third-party service providers. Investments classified according to this process as "illiquid investments" are those subject to the 15% limit on illiquid investments.

The Funds have a liquidity risk management program designed to assess and manage the Funds' liquidity risk. The program has been approved by the Board, which has also approved the appointment of a liquidity program administrator (the "LPA"). The LPA is responsible for oversight of the Funds' liquidity risk management efforts, including classifying the liquidity of each Fund investment, ensuring the Fund holds no more than 15% of net asset value in illiquid investments, and reporting to the Board regarding the effectiveness and operation of the liquidity risk management program.

OTHER INVESTMENT RISKS

Overview. An investment in the Funds should be made with an understanding of the risks that an investment in the Fund shares entails, including the risk that the financial condition of the issuers of the equity securities or the general condition of the securities market may worsen and the value of the securities and therefore the value of the Fund may decline. The Funds may not be an appropriate investment for those who are unable or unwilling to assume the risks involved generally with such an investment. The past market and earnings performance of any of the securities included in the Funds is not predictive of their future performance.

Borrowing and Leverage Risk. The Funds may borrow money for cash management purposes or investment purposes. Borrowing for investment is a form of leverage. Leveraging investments, by purchasing securities with borrowed money, is a speculative technique which increases investment risk, but also increases investment opportunity. Because substantially all of a Fund's assets will fluctuate in value, whereas the interest obligations on borrowings may be fixed, the NAV per share of the Fund will fluctuate more when the Fund is leveraging its investments than would otherwise be the case. Moreover, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the returns on the borrowed funds. Under adverse conditions, a Fund might have to sell portfolio securities to meet interest or principal payments at a time when investment considerations would not favor such sales. Consistent with the requirements of the 1940 Act, a Fund must maintain continuous asset coverage (total assets, including assets acquired with borrowed funds, less liabilities exclusive of borrowings) of 300% of all amounts borrowed. If at any time the value of a Fund's assets should fail to meet this 300% coverage test, the Fund, within three days (not including weekends and holidays), will reduce the amount of the Fund's borrowings to the extent necessary to meet this 300% coverage requirement. Maintenance of this percentage limitation may result in the sale of portfolio securities at a time when investment considerations would not favor such sale.

Counterparty Credit Risk. The Funds will not enter into any uncleared swap (i.e., not cleared by a central counterparty) unless the Adviser believes that the other party to the transaction is creditworthy. The counterparty to an uncleared swap will typically be a major global financial institution. The Funds will be subject to credit risk with respect to the counterparties with which the Fund enter into derivatives contracts and other transactions such as repurchase agreements or reverse repurchase agreements. The Funds' ability to profit from these types of investments and transactions will depend on the willingness and ability of their counterparty to perform its obligations. If a counterparty fails to meet its contractual obligations, a Fund may be unable to terminate or realize any gain on the investment or transaction, resulting in a loss to the Fund. The Funds may experience significant delays in obtaining any recovery in an insolvency, bankruptcy, or other reorganization proceeding involving its counterparty (including recovery of any collateral posted by it) and may obtain only a limited recovery or may obtain no recovery in such circumstances. If a Fund holds collateral posted by its counterparty, it may be delayed or prevented from realizing on the collateral in the event of a bankruptcy or insolvency proceeding relating to the counterparty. Under applicable law or contractual provisions, including if a Fund enters into an investment or transaction with a financial institution and such financial institution (or an affiliate of the financial institution) experiences financial difficulties, then a Fund may in certain situations be prevented or delayed from exercising its rights to terminate the investment or transaction, or to realize on any collateral, and may result in the suspension of payment and delivery obligations of the parties under such investment or transactions or in another institution being substituted for that financial institution without the consent of the Fund. Further, a Fund may be subject to "bail-in" risk under applicable law whereby, if required by the financial institution's regulatory authority, the financial institution's liabilities could be written down, eliminated or converted into equity or an alternative instrument of ownership. A bail-in of a financial institution may result in a reduction in value of some or all of its securities and, if a Fund holds such securities or has entered into a transaction with such a financial security when a bail-in occurs, the Fund may also be similarly impacted.

Upon entering into a cleared swap, a Fund is required to deposit with its FCM an amount of cash or cash equivalents equal to a small percentage of the notional amount (this amount is subject to change by the FCM or clearing house through which the trade is cleared). This amount, known as “initial margin,” is in the nature of a performance bond or good faith deposit on the cleared swap and is returned to the Fund upon termination of the swap, assuming all contractual obligations have been satisfied. Subsequent payments, known as “variation margin” to and from the broker will be made daily as the price of the swap fluctuates, making the long and short position in the swap contract more or less valuable, a process known as “marking-to-market.” The premium (discount) payments are built into the daily price of the swap and thus are amortized through the variation margin. The variation margin payment also includes the daily portion of the periodic payment stream.

A party to a cleared swap is subject to the credit risk of the clearing house and the FCM through which it holds its position. Credit risk of market participants with respect to cleared swaps is concentrated in a few clearing houses, and it is not clear how an insolvency proceeding of a clearing house would be conducted and what impact an insolvency of a clearing house would have on the financial system. An FCM is generally obligated to segregate all Fund received from customers with respect to cleared swap positions from the FCM’s proprietary assets. However, all funds and other property received by an FCM from its customers are generally held by the FCM on a commingled basis in an omnibus account, and the FCM may invest those funds in certain instruments permitted under the applicable regulations. The assets of a Fund might not be fully protected in the event of the bankruptcy of the Fund’s FCM, because the Fund would be limited to recovering only a pro rata share of all available funds segregated on behalf of the FCM’s customers for a relevant account class. Also, the FCM is required to transfer to the clearing house the amount of margin required by the clearing house for cleared swaps positions, which amounts are generally held in an omnibus account at the clearing house for all customers of the FCM. Regulations promulgated by the CFTC require that the FCM notify the clearing house of the amount of initial margin provided by the FCM to the clearing house that is attributable to each customer. However, if the FCM does not provide accurate reporting, the Fund is subject to the risk that a clearing house will use the Fund’s assets held in an omnibus account at the clearing house to satisfy payment obligations of a defaulting customer of the clearing member to the clearing house. In addition, if an FCM does not comply with the applicable regulations or its agreement with the Fund, or in the event of fraud or misappropriation of customer assets by an FCM, the Fund could have only an unsecured creditor claim in an insolvency of the FCM with respect to the margin held by the FCM.

Cybersecurity Risk. Investment companies, such as the Funds, and their service providers may be subject to operational and information security risks resulting from cyber attacks. Cyber attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cybersecurity breaches. Cyber attacks affecting the Funds or the Advisor, the Funds’ custodian or transfer agent, or intermediaries or other third-party service providers may adversely impact the Funds. For instance, cyber attacks may interfere with the processing of shareholder transactions, impact a Fund’s ability to calculate its net asset value, cause the release of private shareholder information or confidential company information, impede trading, subject the Fund to regulatory fines or financial losses, and cause reputational damage. A Fund may also incur additional costs for cybersecurity risk management purposes. While the Funds and their service providers have established business continuity plans and risk management systems designed to prevent or reduce the impact of cybersecurity attacks, such plans and systems have inherent limitations due in part to the ever-changing nature of technology and cybersecurity attack tactics, and there is a possibility that certain risks have not been adequately identified or prepared for. Furthermore, the Funds cannot control any cybersecurity plans or systems implemented by their service providers.

Derivatives Risk. The use of derivatives presents risks different from, and possibly greater than, the risks associated with investing directly in traditional securities. Among the risks presented are market risk, credit risk, management risk and liquidity risk. The use of derivatives can lead to

losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the derivatives. In addition, when a Fund invests in certain derivative securities, including, but not limited to, when-issued securities, forward commitments, futures contracts and interest rate swaps, a Fund is effectively leveraging its investments, which could result in exaggerated changes in the net asset value of the Fund's shares and can result in losses that exceed the amount originally invested. The success of the Advisor's derivatives strategies will depend on its ability to assess and predict the impact of market or economic developments on the underlying asset, index or rate and the derivative itself, without the benefit of observing the performance of the derivative under all possible market conditions. Liquidity risk exists when a security cannot be purchased or sold at the time desired, or cannot be purchased or sold without adversely affecting the price. Certain specific risks associated with an investment in derivatives may include: market risk, credit risk, correlation risk, liquidity risk, legal risk and systemic or "interconnection" risk, as specified below.

Market Risk. Market risk is the risk that the value of the underlying assets may go up or down. Adverse movements in the value of an underlying asset can expose a Fund to losses. Market risk is the primary risk associated with derivative transactions. Derivative instruments may include elements of leverage and, accordingly, fluctuations in the value of the derivative instrument in relation to the underlying asset may be magnified. The successful use of derivative instruments depends upon a variety of factors, particularly the portfolio manager's ability to predict movements of the securities, currencies and commodities markets, which may require different skills than predicting changes in the prices of individual securities. There can be no assurance that any particular strategy adopted will succeed. A decision to engage in a derivative transaction will reflect the portfolio managers' judgment that the derivative transaction will provide value to a Fund and its shareholders and is consistent with a Fund's objective, investment limitations and operating policies. In making such a judgment, the portfolio managers will analyze the benefits and risks of the derivative transactions and weigh them in the context of a Fund's overall investments and investment objective.

Credit Risk. Credit risk is the risk that a loss may be sustained as a result of the failure of a counterparty to comply with the terms of a derivative instrument. Specifically, the FCM or the clearing house could fail to perform its obligations, causing significant losses to a Fund. For example, a Fund could lose margin payments it has deposited with an FCM as well as any gains owed but not paid to the Fund, if the FCM or clearing house becomes insolvent or otherwise fails to perform its obligations. Credit risk of market participants with respect to derivatives that are centrally cleared is concentrated in a few clearing houses and it is not clear how an insolvency proceeding of a clearing house would be conducted and what impact an insolvency of a clearing house would have on the financial system. Under current CFTC regulations, a FCM maintains customers' assets in a bulk segregated account. If a FCM fails to do so, or is unable to satisfy a substantial deficit in a customer account, its other customers may be subject to risk of loss of their funds in the event of that FCM's bankruptcy. In that event, in the case of futures and options on futures, the FCM's customers are entitled to recover, even in respect of property specifically traceable to them, only a proportional share of all property available for distribution to all of that FCM's customers. In addition, if the FCM does not comply with the applicable regulations, or in the event of a fraud or misappropriation of customer assets by the FCM, a Fund could have only an unsecured creditor claim in an insolvency of the FCM with respect to the margin held by the FCM. FCMs are also required to transfer to the clearing house the amount of margin required by the clearing house, which amount is generally held in an omnibus account at the clearing house for all customers of the FCM.

Correlation Risk. Correlation risk is the risk that there might be an imperfect correlation, or even no correlation, between price movements of a derivative instrument and price movements of investments being hedged. When a derivative transaction is used to completely

hedge another position, changes in the market value of the combined position (the derivative instrument plus the position being hedged) result from an imperfect correlation between the price movements of the two instruments. With a perfect hedge, the value of the combined position remains unchanged with any change in the price of the underlying asset. With an imperfect hedge, the value of the derivative instrument and its hedge are not perfectly correlated. For example, if the value of a derivative instrument used in a short hedge (such as writing a call option, buying a put option or selling a futures contract) increased by less than the decline in value of the hedged investments, the hedge would not be perfectly correlated. This might occur due to factors unrelated to the value of the investments being hedged, such as speculative or other pressures on the markets in which these instruments are traded. The effectiveness of hedges using instruments on indices will depend, in part, on the degree of correlation between price movements in the underlying stock and the price movements in the investment being hedged.

Liquidity Risk. Liquidity risk is the risk that a derivative instrument cannot be sold, closed out or replaced quickly at or very close to its fundamental value. Generally, exchange contracts are very liquid because the exchange clearing house is the counterparty of every contract. OTC transactions are less liquid than exchange-traded derivatives since they often can only be closed out with the other party to the transaction. A Fund might be required by applicable regulatory requirements to make margin payments when it takes positions in derivative instruments involving obligations to third parties (i.e., instruments other than purchase options). If a Fund is unable to close out its positions in such instruments, it might be required to continue to maintain such assets or accounts or make such payments until the position expires, matures or is closed out. These requirements might impair a Fund's ability to sell a security or make an investment at a time when it would otherwise be favorable to do so, or require that a Fund sell a portfolio security at a disadvantageous time. A Fund's ability to sell or close out a position in an instrument prior to expiration or maturity depends upon the existence of a liquid secondary market or, in the absence of such a market, the ability and willingness of the counterparty to enter into a transaction closing out the position. Due to liquidity risk, there is no assurance that any derivatives position can be sold or closed out at a time and price that is favorable to a Fund.

Legal Risk. Legal risk is the risk of loss caused by the unenforceability of a party's obligations under the derivative. While a party seeking price certainty agrees to surrender the potential upside in exchange for downside protection, the party taking the risk is looking for a positive payoff. Despite this voluntary assumption of risk, a counterparty that has lost money in a derivative transaction may try to avoid payment by exploiting various legal uncertainties about certain derivative products.

Systemic or "Interconnection" Risk. Systemic or "interconnection" risk is the risk that a disruption in the financial markets will cause difficulties for all market participants. In other words, a disruption in one market will spill over into other markets, perhaps creating a chain reaction. Much of the OTC derivatives market takes place among the OTC dealers themselves, thus creating a large interconnected web of financial obligations. This interconnectedness raises the possibility that a default by one large dealer could create losses for other dealers and destabilize the entire market for OTC derivative instruments.

Government Regulation of Derivatives Risk. It is possible that government regulation of various types of derivative instruments, including swap agreements, may limit or prevent the Funds from using such instruments as a part of its investment strategy, and could ultimately prevent the Funds from being able to achieve its investment objective. It is impossible to predict fully the effects of legislation and regulation in this area, but the effects could be substantial and adverse.

The regulation of derivatives in the U.S., the EU and other jurisdictions is a rapidly changing area of law and is subject to modification by government and judicial action. Recent legislative and regulatory reforms, including the Dodd-Frank Act, have resulted in new regulation of derivatives, including clearing, margin reporting, recordkeeping and registration requirements for certain types of derivatives. Because these requirements are new and evolving, and certain of the rules are not yet final, their ultimate impact remains unclear. New regulations could, among other things, restrict a Fund's ability to engage in swap transactions (for example, by making certain types of swap transactions no longer available to a Fund) and/or increase the costs of such swap transactions (for example, by increasing margin or capital requirements), and a Fund may as a result be unable to execute its investment strategies in a manner that the Adviser might otherwise choose. There is a possibility of future regulatory changes altering, perhaps to a material extent, the nature of an investment in the Funds or the ability of the Funds to continue to implement its investment strategies.

Also, as described above, in the event of a counterparty's (or its affiliate's) insolvency, a Fund's ability to exercise remedies could be stayed or eliminated under special resolution regimes adopted in the United States, the EU and various other jurisdictions. Such regimes provide government authorities with broad authority to intervene when a financial institution is experiencing financial difficulty and may prohibit the Fund from exercising termination rights based on the financial institution's insolvency. In particular, in the EU, governmental authorities could reduce, eliminate or convert to equity the liabilities to the Fund of a counterparty experiencing financial difficulties (sometimes referred to as a "bail in").

Rule 18f-4 under the 1940 Act governs the Funds' use of derivative instruments and certain other transactions that create future payment and/or delivery obligations by the Funds. Rule 18f-4 permits the Funds to enter into Derivatives Transactions (as defined below) and certain other transactions notwithstanding the restrictions on the issuance of "senior securities" under Section 18 of the 1940 Act. Section 18 of the 1940 Act, among other things, prohibits open-end funds, including the Fund, from issuing or selling any "senior security," other than borrowing from a bank (subject to a requirement to maintain 300% "asset coverage"). In connection with the adoption of Rule 18f-4, the U.S. Securities and Exchange Commission ("SEC") eliminated the asset segregation framework arising from prior SEC guidance for covering Derivatives Transactions and certain financial instruments.

Under Rule 18f-4, "Derivatives Transactions" include the following: (i) any swap, security-based swap (including a contract for differences), futures contract, forward contract, option (excluding purchased options), any combination of the foregoing, or any similar instrument, under which a Fund is or may be required to make any payment or delivery of cash or other assets during the life of the instrument or at maturity or early termination, whether as margin or settlement payment or otherwise; (ii) any short sale borrowing; (iii) reverse repurchase agreements and similar financing transactions, if the Fund elects to treat these transactions as Derivatives Transactions under Rule 18f-4; and (iv) when-issued or forward-settling securities (e.g., firm and standby commitments, including to-be-announced ("TBA") commitments, and dollar rolls) and non-standard settlement cycle securities, unless the Fund intends to physically settle the transaction and the transaction will settle within 35 days of its trade date.

Unless a Fund is relying on the Limited Derivatives User Exception (as defined below), the Fund must comply with Rule 18f-4 with respect to its Derivatives Transactions. Rule 18f-4, among other things, requires the Fund to (i) appoint a Derivatives Risk Manager, (ii) maintain a Derivatives Risk Management Program designed to identify, assess, and reasonably manage the risks associated with Derivatives Transactions; (iii) comply with certain value-at-risk (VaR)-based leverage limits (VaR is an estimate of an instrument's or portfolio's potential losses over a given time horizon and at a specified confidence level); and (iv) comply with certain Board reporting and recordkeeping requirements.

Rule 18f-4 provides an exception from the requirements to appoint a Derivatives Risk Manager, adopt a Derivatives Risk Management Program, comply with certain VaR-based leverage limits, and comply with certain Board oversight and reporting requirements if a Fund's "derivatives exposure" (as defined in Rule 18f-4) is limited to 10% of its net assets (as calculated in accordance with Rule 18f-4) and the Fund adopts and implements written policies and procedures reasonably designed to manage its derivatives risks (the "Limited Derivatives User Exception"). The Funds are not expected to be able to rely upon this exception.

Pursuant to Rule 18f-4, if a Fund enters into reverse repurchase agreements or similar financing transactions, the Fund will (i) aggregate the amount of indebtedness associated with all of its reverse repurchase agreements or similar financing transactions with the amount of any other "senior securities" representing indebtedness (e.g., bank borrowings, if applicable) when calculating the Fund's asset coverage ratio or (ii) treat all such transactions as Derivatives Transactions.

These and other new rules and regulations could, among other things, further restrict the Funds' ability to engage in, or increase the cost to a Fund of, derivatives transactions, for example, by making some types of derivatives no longer available to the Fund, increasing margin or capital requirements, or otherwise limiting liquidity or increasing transaction costs. The implementation of the clearing requirement for certain swaps has increased the costs of derivatives transactions for a Fund, since a Fund has to pay fees to its clearing members and are typically required to post more margin for cleared derivatives than they have historically posted for bilateral derivatives. The costs of derivatives transactions may increase further as clearing members raise their fees to cover the costs of additional capital requirements and other regulatory changes applicable to the clearing members. Certain aspects of these regulations are still being implemented, so their potential impact on the Funds and the financial system are not yet known. While the regulations and central clearing of some derivatives transactions are designed to reduce systemic risk (i.e., the risk that the interdependence of large derivatives dealers could cause them to suffer liquidity, solvency or other challenges simultaneously), there is no assurance that the mechanisms imposed under the regulations will achieve that result, and in the meantime, as noted above, central clearing, minimum margin requirements and related requirements expose the Funds to new kinds of risks and costs.

Illiquid Securities Risk. Illiquid securities may be difficult to dispose of at the price at which the Funds have valued the securities and at the times when the Fund believes it is desirable to do so. The market price of illiquid securities generally is more volatile than that of more liquid securities, which may adversely affect the price that the Fund recovers upon the sale of such securities. Illiquid securities are also more difficult to value, especially in challenging markets. Investment of the Fund's assets in illiquid securities may restrict the Fund's ability to take advantage of market opportunities. The risks associated with illiquid securities may be particularly acute in situations in which the Fund's operations require cash and could result in the Fund incurring losses on the sale of illiquid or restricted securities.

Listing Standards Risk. The Funds are required by the Exchange to comply with certain listing standards (which includes certain investment parameters) in order to maintain its listing on the Exchange. Compliance with these listing standards may compel a Fund to sell securities at an inopportune time or for a price other than the security's then-current market value. The sale of securities in such circumstances could limit a Fund's profit or require the Fund to incur a loss, and as a result, the Fund's performance could be impacted.

Market Conditions. Events in certain sectors historically have resulted, and may in the future result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. These events have included, but are not limited to: bankruptcies, corporate restructurings, and other events related to the sub-prime mortgage crisis in 2008; governmental efforts to limit short selling and high frequency trading; measures to address U.S. federal and state budget deficits; social,

political, and economic instability in Europe; economic stimulus by the Japanese central bank; steep declines in oil prices; dramatic changes in currency exchange rates; China's economic slowdown; Russia's invasion of Ukraine; and circumstances such as pandemics or epidemics in one or more countries or regions. Interconnected global economies and financial markets increase the possibility that conditions in one country or region might adversely impact issuers in a different country or region. Such events may cause significant declines in the values and liquidity of many securities and other instruments. It is impossible to predict whether such conditions will recur. Because such situations may be widespread, it may be difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of such events.

An outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 was first detected in China in December 2019 and spread globally. The outbreak has resulted in certain travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, cancellations, supply chain disruptions, and lower consumer demand, as well as general concern and uncertainty. The impact of COVID-19, and other infectious illness outbreaks that may arise in the future, could adversely affect the economies of many nations or the entire global economy, individual issuers and capital markets in ways that cannot necessarily be foreseen. In addition, the impact of infectious illnesses in emerging market countries may be greater due to generally less established healthcare systems. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty.

Regulatory Margin Risk. In recent years, regulators across the globe, including the CFTC and the U.S. banking regulators, have adopted margin requirements applicable to uncleared swaps. While the Funds are not directly subject to these requirements, where the Funds' counterparties are subject to the requirements, uncleared swaps between a Fund and those counterparties are required to be marked-to-market on a daily basis, and collateral is required to be exchanged to account for any changes in the value of such swaps. The rules impose a number of requirements as to these exchanges of margin, including as to the timing of transfers, the type of collateral (and valuations for such collateral) and other matters that may be different than what the Fund would agree with its counterparty in the absence of such regulation. In all events, where a Fund is required to post collateral to its swap counterparty, such collateral will be posted to an independent bank custodian, where access to the collateral by the swap counterparty will generally not be permitted unless the Fund is in default on its obligations to the swap counterparty.

In addition to the variation margin requirements, regulators have adopted "initial" margin requirements applicable to uncleared swaps. Where applicable, these rules require parties to an uncleared swap to post, to a custodian that is independent from the parties to the swap, collateral (in addition to any "variation margin" collateral noted above) in an amount that is either (i) specified in a schedule in the rules or (ii) calculated by the regulated party in accordance with a model that has been approved by that party's regulator(s). At this time, the initial margin rules do not apply to the Funds' swap trading relationships. However, the rules are being implemented on a phased basis, and in the near future, the rules may apply to the Funds. In the event that the rules apply, they would impose significant costs on the Funds' ability to engage in uncleared swaps and, as such, could adversely affect the Adviser's ability to manage the Funds, may impair the Funds' ability to achieve their investment objective and/or may result in reduced returns to the Funds' investors.

Termination and Default Risk. Certain of the Funds' swap agreements contain termination provisions that, among other things, require the Fund to maintain a pre-determined level of net assets, and/or provide limits regarding the decline of the Fund's net asset value over specific periods of time, which may or may not be exclusive of redemptions. If a Fund were to trigger such provisions and have open derivative positions, at that time counterparties to the swaps could elect to terminate such

agreements and request immediate payment in an amount equal to the net liability positions, if any, under the relevant agreement.

U.S. Government Securities. U.S. government securities are subject to interest rate risk but generally do not involve the credit risks associated with investments in other types of debt securities. As a result, the yields available from U.S. government securities are generally lower than the yields available from other debt securities. U.S. government securities are guaranteed only as to the timely payment of interest and the payment of principal when held to maturity. While securities issued or guaranteed by U.S. federal government agencies (such as Ginnie Mae) are backed by the full faith and credit of the U.S. Department of the Treasury, securities issued by government sponsored entities (such as Fannie Mae and Freddie Mac) are solely the obligation of the issuer and generally do not carry any guarantee from the U.S. government. No assurance can be given that the U.S. government will provide financial support to its government sponsored entities or any other agency if not obligated by law to do so.

SPECIAL CONSIDERATIONS

Tracking and Correlation. Several factors may affect each Fund's ability to achieve a high degree of correlation with each Fund's underlying security ("Underlying Security"). Among these factors are: (i) the Fund's fees and expenses, including brokerage (which may be increased by high portfolio turnover) and the costs associated with the use of derivatives; (ii) an imperfect correlation between the performance of instruments held by the Fund, such as swaps, and the performance of the Underlying Security; (iii) bid-ask spreads (the effect of which may be increased by portfolio turnover); (iv) holding instruments traded in a market that has become illiquid or disrupted; (v) the Fund's share prices being rounded to the nearest cent; (vi) changes to the Underlying Security that are not disseminated in advance; (vii) the need to conform the Fund's portfolio holdings to comply with investment restrictions or policies or regulatory or tax law requirements; limit-up or limit-down trading halts on options or futures contracts which may prevent the Fund from purchasing or selling options or futures contracts; (viii) early and unanticipated closings of the markets on which the holdings of the Fund trade, resulting in the inability of the Fund to execute intended portfolio transactions; and (ix) fluctuations in currency exchange rates.

Also, because each Fund engages in daily rebalancing to position its portfolio so that its exposure to the Underlying Security is consistent with the Fund's daily investment objective, disparities between estimated and actual purchases and redemptions of the Fund may cause the Fund to be under- or overexposed to its benchmark. This may result in greater tracking and correlation error.

Furthermore, each 2X Long ETF has an investment objective to seek daily investment results, before fees and expenses, that correspond to specified multiple (e.g. 200%) of the daily performance of the Underlying Security for a single day, not for any other period. Conversely, each 2X Inverse ETF has an investment objective to seek daily inverse investment results, before fees and expenses, that correspond to specified multiple (e.g. -200%) of the daily performance of the Underlying Security for a single day, not for any other period. A "single day" is measured from the time a Fund calculates its NAV to the time of the Fund's next NAV calculation. In addition, while a close correlation of a Fund to the Underlying Security may be achieved on any single day, the Fund's performance for any other period is the result of its return for each day compounded over the period. This usually will differ in amount and possibly even direction from specified multiple (e.g. 200% or -200%) of the daily return of the Underlying Security for the same period, before accounting for fees and expenses, as further described in the Funds' Prospectus.

During periods of higher Underlying Security volatility, the volatility of the Underlying Security may affect a Fund's return as much as, or more than, the return of the Underlying Security. The impact of compounding will impact each shareholder differently depending on the period of time

an investment in a Fund is held and the volatility of the Underlying Security during a shareholder's holding period of an investment in the Fund.

Leverage. The Funds intend to use, on a regular basis, leveraged investment techniques in pursuing their investment objectives. Leverage exists when a Fund achieves the right to a return on a capital base that exceeds the Fund's assets. Utilization of leverage involves special risks and should be considered to be speculative. Specifically, leverage creates the potential for greater gains to Fund shareholders during favorable market conditions and the risk of magnified losses during adverse market conditions. Leverage is likely to cause higher volatility of the NAVs of the Fund's Shares. Leverage may also involve the creation of a liability that does not entail any interest costs or the creation of a liability that requires the Fund to pay interest which would decrease the Fund's total return to shareholders. If a Fund achieves its investment objectives, during adverse market conditions, shareholders should experience a loss greater than they would have incurred had the Fund not been leveraged.

INVESTMENT LIMITATIONS

Fundamental. The investment limitations described below have been adopted by the Trust with respect to the Funds and are fundamental ("Fundamental"), *i.e.*, they may not be changed without the affirmative vote of a majority of the outstanding shares of a Fund. As used in the Prospectus and the Statement of Additional Information, the term "majority" of the outstanding shares of the Funds means the lesser of: (1) 67% or more of the outstanding shares of a Fund present at a meeting, if the holders of more than 50% of the outstanding shares of a Fund are present or represented at such meeting; or (2) more than 50% of the outstanding shares of a Fund. Other investment practices which may be changed by the Board of Trustees without the approval of shareholders to the extent permitted by applicable law, regulation or regulatory policy are considered non-fundamental ("Non-Fundamental").

The Funds:

1. May not borrow money except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction.
2. May not issue any senior securities to others, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction.
3. May not underwrite securities issued by others except to the extent the Fund may be deemed to be an underwriter under the federal securities laws, in connection with the disposition of portfolio securities.
4. May not invest more than 25% of the value of its net assets in the securities of one or more issuers conducting their principal business activities in the same industry or group of industries, except that each Fund will be concentrated in the industry to which its Underlying Security is assigned (*i.e.*, hold more than 25% of its total assets in investments that provide exposure to the industry to which the Underlying Security is assigned). The limitation against industry concentration does not apply to investments in securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities, or to shares of investment companies; however, the Funds will not invest more than 25% of its net assets in any investment company that so concentrates. In complying with this restriction, the Funds will not consider a bank-issued guaranty or financial guaranty insurance as a separate security.
5. May not purchase or sell real estate except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction.

6. May not make loans to others, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction.
7. May invest in commodities only as permitted by the 1940 Act or other governing statute, by the Rules thereunder, or by the U.S. Securities and Exchange Commission (“SEC”) or other regulatory agency with authority over the Funds.

Except with respect to borrowing, if a percentage or rating restriction on an investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in such percentages or restrictions resulting from any cause other than actions by the Funds will not be considered a violation. Currently, subject to modification to conform to the 1940 Act as interpreted or modified, the Funds are permitted, consistent with the 1940 Act, to borrow, and pledge its shares to secure such borrowing, provided, that immediately thereafter there is asset coverage of at least 300% for all borrowings by a Fund from a bank. If borrowings exceed this 300% asset coverage requirement by reason of a decline in net assets of a Fund, the Fund will reduce its borrowings within three days (not including Sundays and holidays) to the extent necessary to comply with the 300% asset coverage requirement. The 1940 Act also permits a Fund to borrow for temporary purposes only in an amount not exceeding 5% of the value of the Fund’s total assets at the time when the loan is made. A loan shall be presumed to be for temporary purposes if it is repaid within 60 days and is not extended or renewed. To the extent outstanding borrowings of a Fund exceed 5% of the value of the total assets of the Fund, the Fund will not make additional purchases of securities – the foregoing shall not be construed to prevent a Fund from settling portfolio transactions or satisfying shareholder redemptions orders.

Currently, with respect to senior securities, the 1940 Act and regulatory interpretations of relevant provisions of the 1940 Act establish the following general limits, subject to modification to conform to the 1940 Act as interpreted or modified: Open-end registered investment companies such as the Funds are not permitted to issue any class of senior security or to sell any senior security of which they are the issuers. The Trust is, however, permitted to issue separate series of shares and to divide those series into separate classes. Each Fund currently offers one class of shares. The Funds have no intention of issuing senior securities, except that the Trust has issued its shares in separate series and may divide those series into classes of shares. Collateral arrangements with respect to forward contracts, futures contracts or options, including deposits of initial and variation margin, are not considered to be the issuance of a senior security for purposes of this restriction.

With respect to the Funds’ Fundamental Policy #4 as described above, the Funds will consider, to the extent practicable and consistent with applicable rules, regulations of the SEC and applicable guidance from the staff of the SEC, investments of its underlying investment companies when determining its compliance with the policy.

Notwithstanding any of the foregoing limitations, any investment company, whether organized as a trust, association or corporation, or a personal holding company, may be merged or consolidated with or acquired by the Trust, provided that if such merger, consolidation or acquisition results in an investment in the securities of any issuer prohibited by said paragraphs, the Trust shall, within ninety days after the consummation of such merger, consolidation or acquisition, dispose of all of the securities of such issuer so acquired or such portion thereof as shall bring the total investment therein within the limitations imposed by said paragraphs above as of the date of consummation.

MANAGEMENT AND OTHER SERVICE PROVIDERS

Investment Adviser. Tuttle Capital Management, LLC (the “Adviser”), 155 Lockwood Rd., Riverside, Connecticut 06878, is the investment adviser for the Funds. The Adviser is registered as

an investment adviser under the Investment Advisers Act of 1940, as amended. The Adviser is a Delaware limited liability company and was organized in 2012.

The Adviser currently provides investment advisory services pursuant to an investment advisory agreement (the “Advisory Agreement”). Under the terms of the Advisory Agreement, the Adviser manages the investment portfolio of the Funds, subject to the policies adopted by the Trust’s Board of Trustees. In addition, the Adviser: (i) furnishes office space and all necessary office facilities, equipment and executive personnel necessary for managing the assets of the Fund; and (ii) provides guidance and policy direction in connection with its daily management of the Funds’ assets, subject to the authority of the Trust’s Board of Trustees. Under the Advisory Agreement, the Adviser assumes and pays, at its own expense and without reimbursement from the Trust, all ordinary expenses of the Funds, except the fee paid to the Adviser pursuant to the Advisory Agreement, distribution fees or expenses under a Rule 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage commissions and any other portfolio transaction related expenses and fees arising out of transactions effected on behalf of the Funds, credit facility fees and expenses, including interest expenses, and litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Funds’ business.

For its services with respect to the Funds, the Adviser is entitled to receive an annual management fee 1.05%, calculated daily and payable monthly as a percentage of each Fund’s average daily net assets.

The Advisory Agreement was approved by the Trustees (including (including a majority of the Trustees who are not “interested persons” of the Trust, as defined in the 1940 Act (the “Independent Trustees”))) in compliance with the 1940 Act. The Advisory Agreement will continue in force for an initial period of up to two years. Thereafter, the Advisory Agreement is renewable from year to year with respect to the Funds, so long as its continuance is approved at least annually (1) by the vote, cast in person at a meeting called for that purpose, of a majority of the Independent Trustees; and (2) by the majority vote of either the full Board or the vote of a majority of the outstanding shares of each Fund. The Advisory Agreement will terminate automatically in the event of its assignment, and is terminable at any time without penalty by the Board or by a majority of each Fund’s outstanding shares on not less than 60 days’ written notice to the Adviser, or by the Adviser on 90 days’ written notice to the Trust. The Advisory Agreement provides that the Adviser shall not be protected against any liability to the Trust or its shareholders by reason of willful misfeasance, bad faith, or gross negligence on its part in the performance of its duties or from reckless disregard of its obligations or duties thereunder.

The Adviser may make payments to banks or other financial institutions that provide shareholder services and administer shareholder accounts. If a bank or other financial institution were prohibited from continuing to perform all or a part of such services, management of the Funds believe that there would be no material impact on the Funds or their shareholders. Financial institutions may charge their customers fees for offering these services to the extent permitted by applicable regulatory authorities, and the overall return to those shareholders availing themselves of the financial institution’s services will be lower than to those shareholders who do not. The Funds may purchase securities issued by financial institutions that provide such services; however, in selecting investments for the Funds, no preference will be shown for such securities.

Portfolio Manager. As described in the prospectus, Matthew Tuttle serves as the Funds’ Portfolio Manager and is responsible for the day-to-day investment management of the Funds. In addition to the Funds, the Portfolio Manager is responsible for the day-to-day management of certain other accounts, as listed below. The information below is provided as of August 31, 2024:

Portfolio Manager	Other Registered Investment Company Accounts	Assets Managed (\$ billions)	Other Pooled Investment Vehicle Accounts	Assets Managed (\$ millions)	Other Accounts	Assets Managed (\$ millions)	Total Assets Managed (\$ billions)
Matthew Tuttle	15	\$1.0	0	0	0	0	\$1.0

Conflicts of Interests. The Portfolio Manager’s management of “other accounts” may give rise to potential conflicts of interest in connection with his management of the Fund’s investments, on the one hand, and the investments of the other accounts, on the other. The other accounts may have the same investment objective as the Funds. Therefore, a potential conflict of interest may arise as a result of the identical investment objectives, whereby the Portfolio Manager could favor one account over another. Another potential conflict could include the Portfolio Manager’s knowledge about the size, timing and possible market impact of Fund trades, whereby the Portfolio Manager could use this information to the advantage of other accounts and to the disadvantage of the Funds. However, the Adviser has established policies and procedures to ensure that the purchase and sale of securities among all accounts it manages are fairly and equitably allocated.

Compensation. The Portfolio Manager does not receive any special or additional compensation from the Adviser for his services as Portfolio Manager. The Portfolio Manager’s compensation is based solely on the overall financial operating results of the Adviser. The portfolio manager’s compensation is not directly linked to the Funds’ performance, although positive performance and growth in managed assets are factors that may contribute to the Adviser’s distributable profits and assets under management.

Portfolio Manager’s Share Ownership. As of the date of this SAI, the Portfolio Manager did not beneficially own shares of the Funds.

Administrator. Pursuant to a Fund Services Agreement, Commonwealth Fund Services, Inc., 8730 Stony Point Parkway, Suite 205, Richmond, Virginia 23235 (the “Administrator”) serves as the Funds’ administrator. In its capacity as administrator, the Administrator supervises all aspects of the operations of the Funds except those performed by the Adviser. The Administrator provides certain administrative services and facilities to the Funds, including, among other responsibilities, assisting in the preparation and filing of documents required for compliance by the Funds with applicable laws and regulations and arranging for the maintenance of books and records of the Funds. The Administrator receives an asset-based fee computed daily and paid monthly on the average daily net assets of the Funds, subject to a minimum fee plus out-of-pocket expenses.

Fund Sponsor. Rex Advisers, LLC, 1241 Post Road, Second Floor, Fairfield, Connecticut, 06824 (“REX”), provides general strategic support and guidance, as well as marketing support for the Funds including, but not limited to, distributing the Funds’ materials and providing the Funds with access to and the use of REX’s other marketing capabilities, including communications through print and electronic media. For its services, REX is entitled to a fee from the Adviser, which is calculated daily and paid monthly, based on a percentage of the average daily net assets of the Funds.

Fund Accountant and Other Services. Pursuant to a Services Agreement with Citi Fund Services Ohio, Inc. (“Citi”), located at 4400 Easton Commons, Suite 200, Columbus, Ohio 43219, Citi provides certain financial administration services (other than those provided by the Administrator), and fund accounting services to the Funds. As financial administrator, Citi performs services including but not limited to: (1) calculating Fund expenses; (2) calculating the Fund performance data; and (3) providing certain compliance support services. As fund accountant, Citi maintains certain financial records of the Trust and provides accounting services to the Funds that include the daily calculation of each Fund’s NAV. Citi also performs certain other services on behalf of the Trust including providing financial information for the Trust’s federal and state tax returns and financial reports required to be filed with the SEC.

For the financial administration and fund accounting services provided to the Trust, the Trust has agreed to pay to Citi an annual asset based fee as a percentage of the aggregate net assets of the Funds, subject to certain breakpoints and minimum fee requirements. Citi is also entitled to fees for services that it renders with respect to the filing of Form N-PORT, its services related to liquidity risk management and out-of-pocket expenses.

Custodian and Transfer Agency. Pursuant to a Custodial and Agency Services Agreement with the Trust, Citibank, N.A. (“Custodian”), located at 388 Greenwich Street, New York, New York 10048, serves as Custodian for the Funds and safeguards and holds the Funds’ cash and securities, settles the Funds’ securities transactions and collects income on the Funds’ investments. Under the agreement, the Custodian also: (1) provides data required by the Adviser to determine each Fund’s Creation Basket and estimated All Cash Amount for each Business Day); (2) monitors the settlement of securities comprising the Creation Basket and any cash in connection with the purchase and redemption of Creation Units and requests the issuance of related Creation Units; (3) deposits securities comprising the Creation Basket and/or cash received from Authorized Participants in connection with purchases of Creation Units into each Fund’s custody and cash accounts; (4) disburses securities comprising the Creation Basket and/or cash from the Funds’ custody and cash accounts to Authorized Participants in connection with the redemptions of Creation Units; and (5) performs certain other related services, (See “Purchase and Redemption of Creation Units,” below). As transfer agent, the Custodian issues shares of each Fund in Creation Units to fill purchase orders for the Funds’ shares, maintains records of the issuance and redemption of the Funds’ shares, and acts as the Funds’ dividend disbursing agent.

Distributor and Principal Underwriter. Foreside Fund Services, LLC a wholly-owned subsidiary of Foreside Financial Group, LLC (dba ACA Group) (the “Distributor”) the Funds’ distributor, is located at Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor is a broker-dealer registered under the Securities Exchange Act of 1934, as amended (the “1934 Act”), and a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”).

Shares will be continuously offered for sale by the Trust through the Distributor only in whole Creation Units, as described in the section of this SAI entitled “Additional Information About Purchases and Sales.” The Distributor also acts as an agent for the Trust. The Distributor will deliver a prospectus to persons purchasing Shares in Creation Units and will maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Distributor has no role in determining the investment policies of the Funds or which securities are to be purchased or sold by the Funds.

The Board has not adopted a Distribution and Service Plan pursuant to Rule 12b-1 (“Rule 12b-1 Plan”) under the 1940 Act with respect to the Funds. No Rule 12b-1 fees are currently paid by the Funds and there are no plans to impose these fees.

The Adviser and its affiliates may, out of their own resources, pay amounts to third parties for distribution or marketing services on behalf of the Funds. The making of these payments could create a conflict of interest for a financial intermediary receiving such payments.

Legal Counsel. Practus, LLP, 11300 Tomahawk Creek Parkway, Suite 310, Leawood, Kansas 66211, serves as legal counsel to the Trust and the Funds.

Independent Registered Public Accounting Firm. The Funds’ independent registered public accounting firm, Cohen & Company, Ltd. audits the Funds’ annual financial statements, assists in the preparation of certain reports to the SEC, and prepares the Trust’s tax returns. Cohen & Company, Ltd. is located at 1350 Euclid Avenue, Suite 800, Cleveland, Ohio 44115.

TRUSTEES AND OFFICERS OF THE TRUST

Trustees and Officers. The Trust is governed by the Board, which is responsible for protecting the interests of shareholders. The trustees are experienced businesspersons who meet throughout the year to oversee the Trust's activities, review contractual arrangements with companies that provide services to the Funds and review performance. The names, addresses and ages of the trustees and officers of the Trust, together with information as to their principal occupations during the past five years, are listed below.

Each Trustee was nominated to serve on the Board of Trustees based on their particular experiences, qualifications, attributes and skills. Generally, the Trust believes that each Trustee is competent to serve because of their individual overall merits including: (i) experience; (ii) qualifications; (iii) attributes; and (iv) skills.

Ms. Mary Lou H. Ivey has business experience as a practicing tax accountant from 1996 to 2021 and, as such, brings tax, budgeting and financial reporting skills to the Board. Currently, Ms. Ivey serves as the Chief Financial Officer for the Episcopal Church Building Fund since 2022 utilizing her financial knowledge and skills.

Ms. Laura V. Morrison has over 30 years of experience in leadership roles at global stock exchanges and asset managers. She has extensive knowledge of ETFs as well as mutual funds, having set the strategy and managed the product development, sales distribution and marketing teams at a leading provider. Ms. Morrison also guided the growth of several listing exchanges in the U.S. and Europe including NYSE & Cboe Markets.

Mr. Theo H. Pitt has experience as an investor, including his role as trustee of several other investment companies and business experience as Senior Partner of a financial consulting company, as a partner of a real estate partnership and as an Account Administrator for a money management firm.

Dr. David J. Urban is Dean Emeritus and Professor of Marketing at the Jones College of Business, Middle Tennessee State University. He earned a Ph.D. in Business Administration with a concentration in Marketing from the University of Michigan. Dr. Urban also holds a master's degree in Psychology from the University of Michigan and an undergraduate degree in Commerce with a concentration in Marketing from the University of Virginia. His extensive career is marked by significant budget responsibility and accountability, with expertise in marketing, strategic planning, organizational leadership, and management contributing to the Board's long-term goal setting.

The Trust does not believe any one factor is determinative in assessing a Trustee's qualifications, but that the collective experience of each Trustee makes them each highly qualified.

The Chairman of the Board of Trustees is Ms. Ivey, who is not an "interested person" of the Trust, within the meaning of the 1940 Act. The Trust also has an independent Audit Committee that allows the Board to access the expertise necessary of oversee the Trust, identify risks, recognize shareholder concerns and needs and highlight opportunities. The Audit Committee is able to focus Board time and attention to matters of interest to shareholders and, through its private sessions with the Trust's auditor, Chief Compliance Officer and legal counsel, stay fully informed regarding management decisions.

ETFs face a number of risks, including investment risk, compliance risk and valuation risk. The Board oversees management of the Fund's risks directly and through its officers. While day-to-day risk management responsibilities rest with the Fund's Chief Compliance Officer, investment advisers and other service providers, the Board monitors and tracks risk by: (1) receiving and reviewing quarterly reports related to the performance and operations of the Fund; (2) reviewing and

approving, as applicable, the compliance policies and procedures of the Trust, including the Trust's valuation policies and transaction procedures; (3) periodically meeting with the portfolio manager to review investment strategies, techniques and related risks; (4) meeting with representatives of key service providers, including the Fund's investment advisers, administrator, distributor, transfer agent and the independent registered public accounting firm, to discuss the activities of the Fund; (5) engaging the services of the Chief Compliance Officer of the Fund to monitor and test the compliance procedures of the Trust and its service providers; (6) receiving and reviewing reports from the Trust's independent registered public accounting firm regarding the Fund's financial condition and the Trust's internal controls; and (7) receiving and reviewing an annual written report prepared by the Chief Compliance Officer reviewing the adequacy of the Trust's compliance policies and procedures and the effectiveness of their implementation. The Board has concluded that its general oversight of the investment adviser and other service providers as implemented through the reporting and monitoring process outlined above allows the Board to effectively administer its risk oversight function.

Following is a list of the Trustees and executive officers of the Trust and their principal occupation over the last five years. The mailing address of each Trustee and officer is 8730 Stony Point Parkway, Suite 205, Richmond, Virginia, 23235, unless otherwise indicated.

NON-INTERESTED TRUSTEES

NAME, YEAR OF BIRTH AND POSITION WITH THE TRUST	TERM OF OFFICE AND LENGTH OF TIME SERVED	PRINCIPAL OCCUPATION(S) DURING THE PAST FIVE YEARS	NUMBER OF FUNDS IN FUND COMPLEX OVERSEEN BY TRUSTEE	OTHER DIRECTORSHIPS HELD BY TRUSTEE
Mary Lou H. Ivey 1958 Trustee	Indefinite, Since December, 2019	Senior Vice President, Episcopal Church Building Fund (national nonprofit organization), since January 2022. Accountant, Harris, Hardy & Johnstone, P.C., (accounting firm), from 2008 to 2021.	53	Independent Trustee of World Funds Trust for the 23 series of that trust.
Laura V. Morrison 1966 Trustee	Indefinite, Since July 2024	Owner, LVM Advisory LLC (consulting services to financial institutions) since 2024; Director and Member of Nominating and Governance Committee, Women in ETFs (not for profit) (2021 – present); Formerly, Chief Revenue Officer, Direxion (2022-2023); Senior Vice President, Global Head of Listings, Cboe Global Markets (2015-2022).	53	Independent Trustee of World Funds Trust for the 23 series of that trust.

NAME, YEAR OF BIRTH AND POSITION WITH THE TRUST	TERM OF OFFICE AND LENGTH OF TIME SERVED	PRINCIPAL OCCUPATION(S) DURING THE PAST FIVE YEARS	NUMBER OF FUNDS IN FUND COMPLEX OVERSEEN BY TRUSTEE	OTHER DIRECTORSHIPS HELD BY TRUSTEE
Theo H. Pitt, Jr. 1936 Trustee	Indefinite, Since December, 2019	Senior Partner, Community Financial Institutions Consulting (bank consulting) since 1997.	53	Independent Trustee of Chesapeake Investment Trust for the one series of that trust; Chairman of Hillman Capital Management Investment Trust; World Funds Trust for the 23 series of that trust; and Starboard Investment Trust for the ten series of that trust; (all registered investment companies).
Dr. David J. Urban 1955 Trustee	Indefinite, Since December, 2019	Dean Emeritus (since 2023) and Professor of Marketing (since 2013), Jones College of Business, Middle Tennessee State University.	53	Independent Trustee of World Funds Trust for the 23 series of that trust.

OFFICERS WHO ARE NOT TRUSTEES

NAME, AGE AND POSITION(S) WITH THE TRUST	TERM OF OFFICE AND LENGTH OF TIME SERVED	PRINCIPAL OCCUPATION(S) DURING THE PAST FIVE YEARS
David Bogaert 1963 President	Indefinite, Since December 2019	Managing Director of Business Development, Commonwealth Fund Services, Inc. (fund administration), October 2013 – present.
Thomas A. Carter 1966 Vice President	Indefinite, Since December 2019	President Ridgeline Research September 2019 through present; President ALPS Advisors and ALPS Portfolio Solutions Distributors 2007-November 2018. Garden Leave November 2018-September 2019.
Karen M. Shupe 1964 Treasurer and Principal Executive Officer	Indefinite, Since December 2019	Managing Director of Fund Operations, Commonwealth Fund Services, Inc., 2003 to present.
Ann T. MacDonald 1954 Assistant Treasurer and Principal Financial Officer	Indefinite, Since December 2019	Managing Director, Fund Administration and Fund Accounting, Commonwealth Fund Services, Inc., 2003 to present.
John H. Lively 1969 Secretary	Indefinite, Since December 2019	Attorney, Practus, LLP (law firm), May 2018 to present; Attorney, The Law Offices of John H. Lively & Associates, Inc. (law firm), March 2010 to May 2018.

NAME, AGE AND POSITION(S) WITH THE TRUST	TERM OF OFFICE AND LENGTH OF TIME SERVED	PRINCIPAL OCCUPATION(S) DURING THE PAST FIVE YEARS
Holly B. Giangliulio 1962 Assistant Secretary	Indefinite, Since December 2019	Managing Director, Corporate Operations, Commonwealth Fund Services, Inc., January 2015 to present.
Laura Wright 1972 Assistant Secretary	Indefinite, Since July 2022	Manager, Fund Administration, Commonwealth Fund Services, Inc., August 2023 to present, Fund Administrator, Commonwealth Fund Services, Inc., 2016 to 2023.
J. Stephen King 1962 Assistant Secretary	Indefinite, Since September 2022	Attorney, Practus, LLP (law firm), 2020 to present; The TCW Group, Inc. (investment management firm), 2017 to 2020.
Gino E. Malaspina 1968 Assistant Secretary	Indefinite, Since September 2022	Counsel, Practus, LLP (law firm), since August 2022; Vice President and Senior Counsel, State Street Corporation, October 2019 to July 2022; Senior Counsel, Apex Fund Services (formerly, Atlantic Fund Services), June 2014 to October 2019.
Soth Chin 1966 Chief Compliance Officer	Indefinite, Since March 2023	Managing Member of FIT Compliance, LLC (financial services compliance and consulting firm) since October 2016
Julian G. Winters 1968 Assistant Chief Compliance Officer	Indefinite, Since March 2023	Managing Member of Watermark Solutions, LLC (investment compliance and consulting firm) since March 2007.

The Board of Trustees oversees the Trust and certain aspects of the services provided by the Adviser and the Funds' other service providers. Each Trustee will hold office until their successors have been duly elected and qualified or until their earlier resignation or removal. Each officer of the Trust serves at the pleasure of the Board and for a term of one year or until their successors have been duly elected and qualified.

The Trust has a standing Audit Committee of the Board composed of Ms. Ivey, Ms. Morrison, Mr. Pitt and Dr. Urban. The functions of the Audit Committee are to meet with the Trust's independent auditors to review the scope and findings of the annual audit, discuss the Trust's accounting policies, discuss any recommendations of the independent auditors with respect to the Trust's management practices, review the impact of changes in accounting standards on the Trust's financial statements, recommend to the Board the selection of independent registered public accounting firm, and perform such other duties as may be assigned to the Audit Committee by the Board. The Audit Committee met seven times during the 12-month period ended December 31, 2023.

The Nominating and Corporate Governance Committee is comprised of Ms. Ivey, Ms. Morrison, Mr. Pitt and Dr. Urban. The Nominating and Corporate Governance Committee's purposes, duties and powers are set forth in its written charter, which is described in Exhibit C – the charter also describes the process by which shareholders of the Trust may make nominations. The Nominating and Corporate Governance Committee met one time during the 12-month period ended December 31, 2023.

The Qualified Legal Compliance Committee is comprised of Ms. Ivey, Ms. Morrison, Mr. Pitt and Dr. Urban. The Qualified Legal Compliance Committee receives, investigates, and makes recommendations as to the appropriate remedial action in connection with any report of evidence of a material violation of the securities laws or breach of fiduciary duty or similar violation by the Trust, its officers, Trustees, or agents. The Qualified Legal Compliance Committee did not meet during the 12-month period ended December 31, 2023.

Trustee Compensation. Each Trustee who is not an “interested person” of the Trust may receive compensation for their services to the Trust. All Trustees are reimbursed for any out-of-pocket expenses incurred in connection with attendance at meetings. Effective January 1, 2024, each Trustee receives a retainer fee at the annualized rate of \$54,000, paid quarterly. The Independent Chairperson will receive an additional annual fee of \$5,000, paid quarterly. Additionally, each Trustee may receive a fee of \$2,500 per special meeting. Compensation to be received by each Trustee from the Trust for the Funds’ first fiscal year is estimated as follows:

Name of Person / Position	Aggregate Compensation From Fund	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From Fund and Fund Complex Paid To Trustees ^(*)(1)
Mary Lou H. Ivey, Trustee	\$842	\$0	\$0	\$44,639
Laura V. Morrison ⁽²⁾ , Trustee	\$771	\$0	\$0	\$40,876
Theo H. Pitt, Jr., Trustee	\$771	\$0	\$0	\$40,876
Dr. David J. Urban	\$771	\$0	\$0	\$40,876

* The Trust does not pay deferred compensation.

(1) The “Fund Complex” consists of the Funds and all the series of the Trust that are managed by the Adviser.

Trustee Ownership of Fund Shares. The table below shows for each Trustee, the amount of Fund equity securities beneficially owned by each Trustee, and the aggregate value of all investments in equity securities of the Funds of the Trust, as of December 31, 2023, and stated as one of the following ranges: A = None; B = \$1-\$10,000; C = \$10,001-\$50,000; D = \$50,001-\$100,000; and E = over \$100,000.

Name of Trustee	Dollar Range of Equity Securities in the Funds	Aggregate Dollar Range of Equity Securities in all Registered Investment Companies Overseen by the Trustees in Family of Investment Companies
Non-Interested Trustees		
Mary Lou H. Ivey	A	A
Laura V. Morrison	A	A
Theo H. Pitt, Jr.	A	A
Dr. David J. Urban	A	A

Sales Loads. No front-end or deferred sales charges are applied to purchase of Fund shares by current or former trustees, officers, employees or agents of the Trust, the Adviser or the principal underwriter and by the members of their immediate families. No front-end or deferred sales charges are applied to the purchase of Shares.

Policies Concerning Personal Investment Activities. The Funds and the Adviser have each adopted a Code of Ethics, pursuant to Rule 17j-1 under the 1940 Act that permit investment personnel, subject to their particular code of ethics, to invest in securities, including securities that may be purchased or held by the Funds, for their own account.

The Codes of Ethics are on file with, and can be reviewed on the EDGAR Database on the SEC's Internet website at <http://www.sec.gov>.

CONTROL PERSONS AND PRINCIPAL SECURITIES HOLDERS

A principal shareholder is any person who owns (either of record or beneficially) 5% or more of the outstanding shares of the Funds. A control person is one who owns, either directly or indirectly, more than 25% of the voting securities of the Funds or acknowledges the existence of such control. As a controlling shareholder, each of these persons could control the outcome of any proposal submitted to the shareholders for approval, including changes to a Fund's fundamental policies or the terms of the management agreement with the Adviser. Since the economic benefit of investing in an ETF is passed through to the underlying investors of the record owners of 25% or more of the Fund shares, these record owners are not considered the beneficial owners of the Fund's shares or control persons of the Fund.

The Funds have not yet commenced operations as of the date of this SAI.

DETERMINATION OF NET ASSET VALUE

Calculation of Share Price

The NAV of each Fund's shares is determined by dividing the total value of the Fund's portfolio investments and other assets, less any liabilities, by the total number of shares outstanding of the Fund. Shares are valued at the close of regular trading on the Exchange (normally 4:00 p.m., Eastern time) (the "Exchange Close") on each day that the Exchange is open. For purposes of calculating the NAV, a Fund normally use pricing data for domestic equity securities received shortly after the Exchange Close and does not normally take into account trading, clearances or settlements that take place after the Exchange Close. Domestic fixed income and foreign securities are normally priced using data reflecting the earlier closing of the principal markets for those securities. Information that becomes known to a Fund or its agents after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of the security or the NAV determined earlier that day.

Generally, a Fund's domestic securities are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith by the Valuation Designee (as defined below). Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market.

Certain securities or investments for which daily market quotes are not readily available may be valued, pursuant to methodologies established by the Board. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) approved by the Board based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity. Short-term investments having a maturity of 60 days or less may be generally valued at amortized cost when it approximates fair value.

Exchange traded options are valued at the last quoted sales price or, in the absence of a sale, at the mean between the current bid and ask prices on the exchange on which such options are traded. Futures and options on futures are valued at the settlement price determined by the exchange, or, if no settlement price is available, at the last sale price as of the close of business prior to when a Fund calculates NAV. Other securities for which market quotes are not readily available are valued at fair value as determined in good faith by the Valuation Designee (as defined below). Swap agreements and other derivatives are generally valued daily depending on the type of instrument and reference assets based upon market prices, the mean between bid and asked price quotations from market makers or by a pricing service or Valuation Designee (as defined below) in accordance with the valuation procedures approved by the Board.

Under certain circumstances, the Funds may use an independent pricing service approved by the Board to calculate the fair market value of foreign equity securities on a daily basis by applying valuation factors to the last sale price or the mean price as noted above. The fair market values supplied by the independent pricing service will generally reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or the value of other instruments that have a strong correlation to the fair-valued securities. The independent pricing service will also take into account the current relevant currency exchange rate. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because foreign securities may trade on days when Shares are not priced, the value of securities held by a Fund can change on days when Shares cannot be redeemed or purchased. In the event that a foreign security's market quotations are not readily available or are deemed unreliable (for reasons other than because the foreign exchange on which it trades closed before a Fund's calculation of NAV), the security will be valued at its fair market value as determined in good faith by the Fund's Valuation Designee (as defined below).

Investments initially valued in currencies other than the U.S. dollar are converted to U.S. dollars using exchange rates obtained from pricing services or other parties in accordance with the valuation procedures approved by the Board. As a result, the NAV of the Shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the Exchange is closed and an investor is not able to purchase, redeem or exchange Shares.

Investments for which market quotations are not readily available are valued at fair value as determined in good faith pursuant to Rule 2a-5 under the 1940 Act. As a general principle, the fair value of a security or other asset is the price that would be received upon the sale of the security or asset in an orderly transaction between market participants at the measurement date and time. Pursuant to Rule 2a-5, the Board has designated the Adviser as the valuation designee ("Valuation Designee") for the Funds to perform fair value determinations relating to all Fund investments. The Adviser may carry out its designated responsibilities as Valuation Designee through a fair valuation committee, and may apply fair valuation methodologies approved by the Board, or utilize prices or inputs from pricing services, quotation reporting systems, valuation agents and other third-party sources that have been approved by the Board.

Fair valuation may require subjective determinations about the value of a security. While the Funds' and Valuation Designee's policies and procedures are intended to result in a calculation of each Fund's NAV that fairly reflects security values as of the time of pricing, the Fund cannot ensure that fair values accurately reflect the price that the Fund could obtain for a security if it were to dispose of that security as of the time of pricing (for instance, in a forced or distressed sale). The prices used by each Fund may differ from the value that would be realized if the securities were sold.

ADDITIONAL INFORMATION ABOUT PURCHASES AND SALES

PURCHASE AND REDEMPTION OF CREATION UNITS

Creation Units

The Trust issues and sells Shares of the Funds only in Creation Units on a continuous basis on any business day through the Distributor at the Shares' NAV next determined after receipt of an order in proper form. The Distributor processes purchase orders only on a day that the Exchange is open for trading (a "Business Day").

Generally, the consideration for the purchase and redemption of Creation Units will be made entirely in a cash amount equal to the NAV of the shares that constitute the Creation Unit(s) (an "All Cash Amount"). At the discretion of the Adviser, the Funds may elect at any time, and from time to time, to issue and sell Creation Units at NAV for "in kind" consideration, meaning the initiator of a creation or redemption order will deposit or receive as consideration a portfolio of all or some of the securities held in each Fund's portfolio, plus a cash amount (an "In Kind Creation" and "In Kind Redemption").

Creation Orders

The consideration for an In Kind Creation generally consists of the Deposit Securities for each Creation Unit constituting a substantial replication, or representation, of the securities included in a Fund's portfolio as selected by the Adviser ("Fund Securities") and the Cash Component computed as described below. Together, the Deposit Securities and the Cash Component constitute the "Fund Deposit," which represents the minimum investment amount for a Creation Unit of a Fund. The Cash Component serves to compensate the Trust or the Authorized Participant, as applicable, for any differences between the NAV per Creation Unit and the Deposit Amount (as defined below). The Cash Component is an amount equal to the difference between the NAV of the Fund Shares (per Creation Unit) and the "Deposit Amount," an amount equal to the market value of the Deposit Securities. If the Cash Component is a positive number (i.e., the NAV per Creation Unit exceeds the Deposit Amount), the Authorized Participant will deliver the Cash Component. If the Cash Component is a negative number (i.e., the NAV per Creation Unit is less than the Deposit Amount), the Authorized Participant will receive the Cash Component.

In addition, the Trust reserves the right to permit or require the substitution of an amount of cash (that is a "cash in lieu" amount) to be added to the Cash Component to replace any Deposit Security which may not be available in sufficient quantity for delivery or that may not be eligible for transfer through the systems of DTC or the Clearing Process (discussed below) or for other similar reasons. The Trust also reserves the right to permit or require a "cash in lieu" amount where the delivery of Deposit Securities by the Authorized Participant (as described below) would be restricted under the securities laws or where delivery of Deposit Securities to the Authorized Participant would result in the disposition of Deposit Securities by the Authorized Participant becoming restricted under the securities laws, and in certain other situations.

The Custodian, through the NSCC (see the section of this SAI entitled "Purchase and Redemption of Creation Units—Procedures for Creation of Creation Units"), makes available on each Business Day, prior to the opening of business on the Exchange (currently 9:30 a.m. New York time), the list of the name and the required number of shares of each Deposit Security (if any) to be included in the current Fund Deposit (based on information at the end of the previous Business Day) for the Funds. This Fund Deposit is applicable, subject to any adjustments as described below, to orders to effect creations of Creation Units of the Funds until such time as the next-announced composition of the Deposit Securities is made available, or unless the Adviser elects to receive an All Cash Amount in connection with the creation of Creation Units.

The identity and number of shares of the Deposit Securities required for a Fund Deposit for the Funds changes as rebalancing adjustments and corporate action events are reflected within the Funds from time to time by the Adviser, with a view to the investment objective of the Funds. In addition, the Trust reserves the right to permit the substitution of an amount of cash – i.e., a “cash in lieu” amount – to be added to the Cash Component to replace any Deposit Security that may not be available in sufficient quantity for delivery or that may not be eligible for transfer through the systems of DTC or the Clearing Process (discussed below), or which might not be eligible for trading by an Authorized Participant (as defined below) or the investor for which it is acting or other relevant reason. In addition to the list of names and number of securities constituting the current Deposit Securities of a Fund Deposit, the Custodian, through the NSCC, also makes available on each Business Day the estimated Cash Component, effective through and including the previous Business Day, per outstanding Creation Unit of each Fund.

The process for a creation order involving an All Cash Amount will be the same as the process for an In Kind Creation, except that the Cash Component will be the entirety of the amount deposited as consideration for the Creation Unit(s).

Procedures for Creation of Creation Units

All orders to create Creation Units must be placed with the Distributor either (1) through Continuous Net Settlement System of the NSCC (“Clearing Process”), a clearing agency that is registered with the SEC, by a “Participating Party,” i.e., a broker-dealer or other participant in the Clearing Process; or (2) outside the Clearing Process by a DTC Participant. In each case, the Participating Party or the DTC Participant must have executed an agreement with the Distributor with respect to creations and redemptions of Creation Units (“Participant Agreement”); such parties are collectively referred to as “APs” or “Authorized Participants.” Investors should contact the Distributor for the names of Authorized Participants. All Fund Shares, whether created through or outside the Clearing Process, will be entered on the records of DTC for the account of a DTC Participant.

The Distributor will process orders to purchase Creation Units received by 3:00 p.m. New York time on the trade date (“Closing Time”), as long as they are in proper form. If an order to purchase Creation Units is received in proper form by Closing Time, then it will be processed that day. Purchase orders received in proper form after Closing Time will be processed on the following Business Day and will be priced at the NAV determined on that day. In the case of an In Kind Creation, a custom order may be placed by an Authorized Participant in the event that the Trust permits the substitution of an amount of cash to be added to the Cash Component to replace any Deposit Security which may not be available in sufficient quantity for delivery or which may not be eligible for trading by such Authorized Participant or the investor for which it is acting or other relevant reason. The date on which an order to create Creation Units (or an order to redeem Creation Units, as discussed below) is placed is referred to as the “Transmittal Date.” Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Participant Agreement, as described below in the sections entitled “Placement of Creation Orders Using the Clearing Process” and “Placement of Creation Orders Outside the Clearing Process.”

All orders to create Creation Units from investors who are not Authorized Participants shall be placed with an Authorized Participant in the form required by such Authorized Participant. In addition, the Authorized Participant may request the investor to make certain representations or enter into agreements with respect to the order, e.g., to provide for payments of cash, when required. Investors should be aware that their particular broker may not have executed a Participant Agreement and, therefore, orders to create Creation Units of the Funds have to be placed by the investor’s broker through an Authorized Participant that has executed a Participant Agreement. In such cases there

may be additional charges to such investor. At any given time, there may be only a limited number of broker-dealers that have executed a Participant Agreement.

Those placing orders for Creation Units through the Clearing Process should afford sufficient time to permit proper submission of the order to the Distributor prior to the Closing Time on the Transmittal Date. Orders for Creation Units that are effected outside the Clearing Process are likely to require transmittal by the DTC Participant earlier on the Transmittal Date than orders effected using the Clearing Process. Those persons placing orders outside the Clearing Process should ascertain the deadlines applicable to DTC and the Federal Reserve Bank wire system by contacting the operations department of the broker or depository institution effectuating such transfer of the Fund Deposit. For more information about Clearing Process and DTC, see the sections below entitled “Placement of Creation Orders Using the Clearing Process” and “Placement of Creation Orders Outside the Clearing Process.”

Placement of Creation Orders Using the Clearing Process

The Clearing Process is the process of creating or redeeming Creation Units through the Continuous Net Settlement System of the NSCC. All Fund Deposits and/or Cash Component, as applicable, made through the Clearing Process must be delivered through a Participating Party that has executed a Participant Agreement. The Participant Agreement authorizes the Distributor or transfer agent to transmit through the Custodian to NSCC, on behalf of the Participating Party, such trade instructions as are necessary to effect the Participating Party’s creation order. Pursuant to such trade instructions to NSCC, the Participating Party agrees to deliver the requisite Fund Deposits and/or Cash Component, as applicable, to the Trust, together with such additional information as may be required by the Distributor. An order to create Creation Units through the Clearing Process is deemed received by the Distributor or transfer agent on the Transmittal Date if (1) such order is received by the Distributor not later than the Closing Time on such Transmittal Date and (2) all other procedures set forth in the Participant Agreement are properly followed.

Placement of Creation Orders Outside the Clearing Process

All Fund Deposits and/or Cash Component, as applicable, made outside the Clearing Process must be delivered through a DTC Participant that has executed a Participant Agreement. A DTC Participant who wishes to place an order creating Creation Units to be effected outside the Clearing Process does not need to be a Participating Party, but such orders must state that the DTC Participant is not using the Clearing Process and that the creation of Creation Units will instead be effected through a transfer of cash and securities directly through DTC. The Fund Deposit transfer must be ordered by the DTC Participant on the Transmittal Date in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities through DTC to the account of the Fund by no later than 11:00 a.m. New York time on the next Business Day following the Transmittal Date (“DTC Cut-Off-Time”).

All questions as to the amount of an All Cash Amount, the number of Deposit Securities to be delivered, or the amount of a Cash Component, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities, will be determined by the Trust, whose determination shall be final and binding. The amount of cash equal to the Cash Component (including All Cash Amounts) must be transferred directly to the Custodian through the Federal Reserve Bank wire transfer system in a timely manner so as to be received by the Custodian no later than 2:00 p.m. New York time on the next Business Day following the Transmittal Date. An order to create Creation Units outside the Clearing Process is deemed received by the Distributor on the Transmittal Date if (1) such order is received by the Distributor not later than the Closing Time on such Transmittal Date and (2) all other procedures set forth in the Participant Agreement are properly followed. However, if the Custodian does not receive both the requisite Deposit Securities and the Cash Component or the All Cash Amount, as applicable, by 11:00 a.m. and 2:00 p.m., respectively, on the next Business

Day following the Transmittal Date, such order will be canceled. Upon written notice to the Distributor, such canceled order may be resubmitted the following Business Day using the Fund Deposits and/or Cash Components as newly constituted to reflect the then-current Deposit Securities and Cash Component, or the All Cash Amount, as applicable. The delivery of Creation Units so created will occur no later than the third Business Day following the day on which the purchase order is deemed received by the Distributor.

Additional transaction fees may be imposed with respect to transactions effected through a DTC participant outside the Clearing Process and in the limited circumstances in which any cash can be used in lieu of Deposit Securities to create Creation Units. See the section of this SAI entitled “Purchase and Redemption of Creation Units—Creation Transaction Fee.”

Creation Units of an In-Kind Creation may be created in advance of receipt by the Trust of all or a portion of the applicable Deposit Securities. In these circumstances, the initial deposit will have a value greater than the NAV of the Fund Shares on the date the order is placed in proper form since, in addition to available Deposit Securities, cash must be deposited in an amount equal to the sum of (1) the Cash Component plus (2) 125% of the then-current market value of the undelivered Deposit Securities (“Additional Cash Deposit”). The order shall be deemed to be received on the Business Day on which the order is placed provided that the order is placed in proper form prior to Closing Time and funds in the appropriate amount are deposited with the Custodian by 11:00 a.m. New York time the following Business Day. If the order is not placed in proper form by Closing Time or funds in the appropriate amount are not received by 11:00 a.m. the next Business Day, then the order may be deemed to be canceled and the Authorized Participant shall be liable to each Fund for losses, if any, resulting therefrom. An additional amount of cash shall be required to be deposited with the Trust, pending receipt of the undelivered Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount at least equal to 125% of the daily marked-to-market value of the undelivered Deposit Securities. To the extent that undelivered Deposit Securities are not received by 1:00 p.m. New York time on the third Business Day following the day on which the purchase order is deemed received by the Distributor, or in the event a marked-to-market payment is not made within one Business Day following notification by the Distributor that such a payment is required, the Trust may use the cash on deposit to purchase the undelivered Deposit Securities. Authorized Participants will be liable to the Trust and each Fund for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the market value of such Deposit Securities on the day the purchase order was deemed received by the Distributor plus the brokerage and related transaction costs associated with such purchases. The Trust will return any unused portion of the Additional Cash Deposit once all of the undelivered Deposit Securities have been properly received by the Custodian or purchased by the Trust and deposited into the Trust’s custodial account. In addition, a transaction fee will be charged in all cases. See the section below entitled “Creation Transaction Fee.” The delivery of Creation Units so created will occur no later than the third Business Day following the day on which the purchase order is deemed received by the Distributor.

Acceptance of Orders for Creation Units

The Trust reserves the right to reject a creation order transmitted to it by the Distributor if: (1) the order is not in proper form; (2) if the Cash Component paid is incorrect; (3) the investor(s), upon obtaining the Fund Shares ordered, would own 80% or more of the currently outstanding Shares of the Funds; (4) the Deposit Securities delivered are not as disseminated for that date by the Custodian, as described above; (5) acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; or (6) there exist circumstances outside the control of the Trust, the Custodian, transfer agent, the Distributor and the Adviser that make it for all practical purposes impossible to process creation orders. Examples of such circumstances include acts of God; public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures

involving computer or other information systems affecting the Trust, the Adviser, the Distributor or transfer agent, DTC, NSCC, the Custodian or sub-custodian or any other participant in the creation process and similar extraordinary events. The Distributor shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of such prospective creator of its rejection of the order. The Trust, the Custodian, any sub-custodian, the transfer agent and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall any of them incur any liability for the failure to give any such notification. All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust and the Trust's determination shall be final and binding.

Creation Units typically are issued on a "T+1 basis" (that is, one Business Day after trade date). To the extent contemplated by an Authorized Participant's agreement with the Distributor, the Trust will issue Creation Units of an In Kind Creation to such Authorized Participant notwithstanding the fact that the corresponding Portfolio Deposits have not been received in part or in whole, in reliance on the undertaking of the Authorized Participant to deliver the missing Deposit Securities as soon as possible, which undertaking shall be secured by such Authorized Participant's delivery and maintenance of collateral having a value equal to 110%, which the Adviser may change from time to time, of the value of the missing Deposit Securities in accordance with the Trust's then-effective procedures. Such collateral must be delivered no later than 2:00 p.m., Eastern Time, on the contractual settlement date. The only collateral that is acceptable to the Trust is cash in U.S. Dollars or an irrevocable letter of credit in form, and drawn on a bank, that is satisfactory to the Trust. The cash collateral posted by the Authorized Participant may be invested at the risk of the Authorized Participant, and income, if any, on invested cash collateral will be paid to that Authorized Participant.

Information concerning the Trust's current procedures for collateralization of missing Deposit Securities is available from the Distributor or transfer agent. The Authorized Participant Agreement will permit the Trust to buy the missing Deposit Securities at any time and will subject the Authorized Participant to liability for any shortfall between the cost to the Trust of purchasing such securities and the cash collateral or the amount that may be drawn under any letter of credit.

In certain cases, Authorized Participants will create and redeem Creation Units (whether by In Kind Creation/Redemption or for an All Cash Amount) on the same trade date. In these instances, the Trust reserves the right to settle these transactions on a net basis. All questions as to the amount of cash required to be delivered, the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered, as applicable, shall be determined by the Trust, and the Trust's determination shall be final and binding.

Creation Transaction Fee

Authorized Participants will be required to pay to the Custodian a fixed transaction fee ("Creation Transaction Fee") in connection with creation orders that is intended to offset the transfer and other transaction costs associated with the issuance of Creation Units. The standard creation transaction fee will be the same regardless of the number of Creation Units purchased by an investor on the applicable Business Day. The Creation Transaction Fee charged by the Funds' custodian for each creation order is \$250.00.

In addition, a variable fee, payable to each Fund, of a percentage of the value of the Creation Units subject to the transaction may be imposed for cash purchases, non-standard orders, or partial cash purchases of Creation Units. The variable charge is primarily designed to cover additional costs (e.g., brokerage, taxes) involved with buying the securities with cash. The Funds may determine to not charge a variable fee on certain orders when the Adviser has determined that doing so is in the best interests of Fund shareholders. Investors are responsible for the costs of transferring the securities constituting the Deposit Securities to the account of the Trust.

In order to seek to replicate the In Kind Creation order process for creation orders executed in whole or in part with cash, the Trust expects to purchase, in the secondary market or otherwise gain exposure to, the portfolio securities that could have been delivered as a result of an In Kind Creation order pursuant to local law or market convention, or for other reasons (“Creation Market Purchases”). In such cases where the Trust makes Creation Market Purchases, the Authorized Participant will reimburse the Trust for, among other things, any difference between the market value at which the securities and/or financial instruments were purchased by the Trust and the cash-in-lieu amount, applicable registration fees, brokerage commissions and certain taxes.

The Creation Transaction Fee may be waived for the Funds when the Adviser believes that waiver of the Creation Transaction Fee is in the best interest of the Funds. When determining whether to waive the Creation Transaction Fee, the Adviser considers a number of factors including whether waiving the Creation Transaction Fee will: facilitate the initial launch of each Fund; facilitate portfolio rebalancings in a less costly manner; improve the quality of the secondary trading market for the Funds’ shares; and not result in a Fund bearing additional costs or expenses as a result of the waiver.

Redemption Orders

The process to redeem Creation Units is essentially the reverse of the process by which Creation Units are created, as described above. To redeem Shares directly from a Fund, an investor must be an Authorized Participant or must redeem through an Authorized Participant. The Trust redeems Creation Units on a continuous basis on any Business Day through the Distributor at the Shares’ NAV next determined after receipt of an order in proper form. Each Fund will not redeem Shares in amounts less than Creation Units. Authorized Participants must accumulate enough Shares in the secondary market to constitute a Creation Unit in order to have such Shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit.

Generally, Creation Units of the Funds will also be redeemed at NAV principally in cash, although a Fund reserves the right to redeem all or a portion in kind, in each case less a transaction fee as described below. With respect to In Kind Redemptions, the Custodian, through the NSCC, makes available prior to the opening of business on the Exchange (currently 9:30 a.m. New York time) on each Business Day, the identity of the Fund Securities that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as described below) on that day. Fund Securities received on redemption may not be identical to Deposit Securities that are applicable to creations of Creation Units. The redemption proceeds for an In Kind Redemption of a Creation Unit consists of Fund Securities – as announced on the Business Day the request for redemption is received in proper form – plus or minus cash in an amount equal to the difference between the NAV of the Fund Shares being redeemed, as next determined after a receipt of a redemption request in proper form, and the value of the Fund Securities (“Cash Redemption Amount”), less a redemption transaction fee (see the section below entitled “Redemption Transaction Fee”).

The right of redemption may be suspended or the date of payment postponed with respect to the Funds (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the Shares of the Funds or determination of the Funds’ NAV is not reasonably practicable; or (4) in such other circumstances as is permitted by the SEC.

Deliveries of redemption proceeds by each Fund generally will be made within one Business Day (that is “T+1”). However, each Fund reserves the right to settle redemption transactions and

deliver redemption proceeds on a basis other than T+1 to accommodate foreign market holiday schedules, to account for different treatment among foreign and U.S. markets of dividend record dates and dividend ex-dates (that is the last date the holder of a security can sell the security and still receive dividends payable on the security sold), and in certain other circumstances.

The process for a redemption order involving an All Cash Amount will be the same as the process for an In-Kind Redemption, except that the proceeds of the redemption will be paid entirely in cash. Proceeds of redemptions of Creation Units payable in an All Cash Amount will be paid to the Authorized Participant redeeming Shares on behalf of the redeeming investor as soon as practicable after the date of redemption (within seven calendar days thereafter).

Placement of Redemption Orders Using the Clearing Process

Orders to redeem Creation Units through the Clearing Process must be delivered through an Authorized Participant that has executed a Participant Agreement. Investors other than Authorized Participants are responsible for making arrangements with an Authorized Participant for an order to redeem. An order to redeem Creation Units is deemed received by the Trust on the Transmittal Date if: (1) such order is received by the Distributor not later than Closing Time on such Transmittal Date; and (2) all other procedures set forth in the Participant Agreement are properly followed. Such order will be effected based on the NAV of the relevant Fund as next determined. An order to redeem Creation Units using the Clearing Process made in proper form but received by the Distributor after Closing Time will be deemed received on the next Business Day immediately following the Transmittal Date and will be effected at the NAV determined on such next Business Day. The requisite Fund Securities and/or the Cash Redemption Amount, as applicable, will be transferred by the third NSCC business day following the date on which such request for redemption is deemed received.

Placement of Redemption Orders Outside the Clearing Process

Orders to redeem Creation Units outside the Clearing Process must be delivered through a DTC Participant that has executed the Participant Agreement. A DTC Participant who wishes to place an order for redemption of Creation Units to be effected outside the Clearing Process does not need to be a Participating Party, but such orders must state that the DTC Participant is not using the Clearing Process and that redemption of Creation Units will instead be effected through transfer of Fund Shares directly through DTC. An order to redeem Creation Units outside the Clearing Process is deemed received by the Distributor on the Transmittal Date if (1) such order is received by the Distributor not later than Closing Time on such Transmittal Date; (2) such order is accompanied or followed by the requisite number of Fund Shares, which delivery must be made through DTC to the Custodian no later than the DTC Cut-Off-Time, and the Cash Redemption Amount, if owed to the Fund, which delivery must be made by 2:00 p.m. New York Time; and (3) all other procedures set forth in the Participant Agreement are properly followed. After the Distributor receives an order for redemption outside the Clearing Process, the Distributor will initiate procedures to transfer the requisite Fund Securities which are expected to be delivered and the Cash Redemption Amount, if any, by the third Business Day following the Transmittal Date.

The calculation of the value of the Fund Securities and/or the Cash Redemption Amount, as applicable, to be delivered or received upon redemption (by the Authorized Participant or the Trust, as applicable) will be made by the Custodian according to the procedures set forth the section of this SAI entitled "Determination of Net Asset Value" computed on the Business Day on which a redemption order is deemed received by the Distributor. Therefore, if a redemption order in proper form is submitted to the Distributor by a DTC Participant not later than Closing Time on the Transmittal Date, and the requisite number of Shares of each Fund are delivered to the Custodian prior to the DTC Cut-Off-Time, then the value of the Fund Securities and/or the Cash Redemption Amount, as applicable, to be delivered or received (by the Authorized Participant or the Trust, as

applicable) will be determined by the Custodian on such Transmittal Date. If, however, either (1) the requisite number of Shares of the relevant Fund are not delivered by the DTC Cut-Off-Time, as described above, or (2) the redemption order is not submitted in proper form, then the redemption order will not be deemed received as of the Transmittal Date. In such case, the value of the Fund Securities and/or the Cash Redemption Amount, as applicable, to be delivered or received will be computed on the Business Day following the Transmittal Date provided that the Fund Shares of the relevant Fund are delivered through DTC to the Custodian by 11:00 a.m. New York time the following Business Day pursuant to a properly submitted redemption order.

The Trust may in its discretion at any time, or from time to time, exercise its option to redeem Fund Shares solely for consideration in the form of an All Cash Amount, and the redeeming Authorized Participant will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in cash that the Trust may permit, in its sole discretion. In either case, the investor will receive an All Cash Amount payment equal to the NAV of its Fund Shares based on the NAV of Shares of the relevant Fund next determined after the redemption request is received in proper form (minus a transaction fee which will include an additional charge for cash redemptions to offset the Fund's brokerage and other transaction costs associated with the disposition of Fund Securities). Each Fund may also, in its sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities that differs from the exact composition of the Fund Securities, or cash in lieu of some securities added to the Cash Redemption Amount, but in no event will the total value of the securities delivered and the cash transmitted differ from the NAV. Redemptions of Fund Shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and a Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Trust could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws.

An Authorized Participant or an investor for which it is acting that is subject to a legal restriction with respect to a particular security included in the Fund Securities applicable to the redemption of a Creation Unit may be paid an equivalent amount of cash. The Authorized Participant may request the redeeming Beneficial Owner of the Fund Shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment, beneficial ownership of shares or delivery instructions.

Redemption Transaction Fee

Investors will be required to pay to the Custodian a fixed transaction fee ("Redemption Transaction Fee") to offset the transfer and other transaction costs associated with the redemption of Creation Units. The standard redemption transaction fee will be the same regardless of the number of Creation Units redeemed by an investor on the applicable Business Day. The Redemption Transaction Fee charged by the Funds' custodian for each redemption order is \$250.00.

An additional variable fee of up to three (3) times the fixed Transaction Fee plus all commission and fees payable to the Funds in connection with the sale of the Fund Securities (expressed as a percentage value of such Fund Securities) may be imposed for (1) redemptions effected outside the Clearing Process and (2) redemptions made in an All Cash Amount (to offset the Trust's brokerage and other transaction costs associated with the sale of Fund Securities). Investors will also bear the costs of transferring the Fund Securities from the Trust to their account or on their order.

In order to seek to replicate the In Kind Redemption order process for creation orders executed in whole or in part with cash, the Trust expects to sell, in the secondary market, the portfolio securities or settle any financial instruments that may not be permitted to be re-registered in the name of the Participating Party as a result of an In Kind Redemption order pursuant to local law or market

convention, or for other reasons (“Market Sales”). In such cases where the Trust makes Market Sales, the Authorized Participant will reimburse the Trust for, among other things, any difference between the market value at which the securities and/or financial instruments were sold or settled by the Trust and the cash-in-lieu amount, applicable registration fees, brokerage commissions and certain taxes.

Regardless of form, the Redemption Transaction Fee (including any reimbursements related to in cash redemptions or additional variable fees for In Kind Redemptions) will be limited in accordance with the requirements of the SEC applicable to management investment companies offering redeemable securities (currently, no more than 2% of the value of the shares redeemed).

The Redemption Transaction Fee may be waived for the Funds when the Adviser believes that waiver of the Redemption Transaction Fee is in the best interest of the Funds. When determining whether to waive the Redemption Transaction Fee, the Adviser considers a number of factors including whether waiving the Redemption Transaction Fee will: facilitate portfolio rebalancings in a less costly manner; improve the quality of the secondary trading market for the Funds’ shares; and not result in the Funds bearing additional costs or expenses as a result of the waiver.

Custom Baskets

The Fund Securities to be deposited for the purchase of a Creation Unit, and the Fund Securities delivered in connection with a Redemption, may differ, and the Fund may accept “custom baskets.” A custom basket may include any of the following: (i) a basket that is composed of a non-representative selection of a Fund’s portfolio holdings; or (ii) a representative basket that is different from the initial basket used in transactions on the same business day. The Fund has adopted policies and procedures that govern the construction and acceptance of baskets, including heightened requirements for certain types of custom baskets.

ADDITIONAL PAYMENTS TO FINANCIAL INTERMEDIARIES

The Adviser and its affiliates may, out of its own resources and without additional cost to the Funds or their shareholders, pay a solicitation fee to securities dealers or other financial intermediaries (collectively, a “Financial Intermediary.”)

TAXES

The following discussion is a summary of certain U.S. federal income tax considerations affecting the Funds and their shareholders. The discussion reflects applicable U.S. federal income tax laws as of the date of this SAI, which tax laws may be changed or subject to new interpretations by the courts or the Internal Revenue Service (the “IRS”), possibly with retroactive effect. No attempt is made to present a detailed explanation of all U.S. income, estate or gift tax, or foreign, state or local tax concerns affecting the Funds and their shareholders (including shareholders owning large positions in each Fund). The discussion set forth herein does not constitute tax advice. Investors are urged to consult their own tax advisers to determine the tax consequences to them of investing in each Fund.

In addition, no attempt is made to address tax concerns applicable to an investor with a special tax status such as a financial institution, real estate investment trust (“REIT”), insurance company, regulated investment company (“RIC”), individual retirement account, other tax-exempt entity, or dealer in securities. Furthermore, this discussion does not reflect possible application of the alternative minimum tax (“AMT”). Unless otherwise noted, this discussion assumes shares of the Funds (“Shares”) are held by U.S. shareholders (defined below) and that such Shares are held as capital assets.

A U.S. shareholder is a beneficial owner of Shares that is for U.S. federal income tax purposes:

- a citizen or individual resident of the United States (including certain former citizens and former long-term residents);
- a corporation or other entity treated as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States or any state thereof or the District of Columbia;
- an estate, the income of which is subject to U.S. federal income taxation regardless of its source; or
- a trust with respect to which a court within the United States is able to exercise primary supervision over its administration and one or more U.S. persons have the authority to control all of its substantial decisions or a trust has a valid election in effect under applicable Treasury regulations to be treated as a U.S. person.

A “Non-U.S. shareholder” is a beneficial owner of Shares that is an individual, corporation, trust or estate and is not a U.S. shareholder. If a partnership (including any entity treated as a partnership for U.S. federal income tax purposes) holds Shares, the tax treatment of a partner in the partnership generally depends upon the status of the partner and the activities of the partnership. A prospective shareholder who is a partner of a partnership that will hold Shares should consult its tax advisors with respect to the purchase, ownership and disposition of its Shares by the partnership.

Taxation as a RIC. Each Fund intends to qualify and remain qualified as a RIC under the Internal Revenue Code of 1986, as amended (the “Code”). There can be no assurance that it will so qualify. Each Fund will qualify as a RIC if, among other things, it meets the source-of-income and the asset-diversification requirements. With respect to the source-of-income requirement, a Fund must derive in each taxable year at least 90% of its gross income (including tax-exempt interest) from (i) dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including but not limited to gains from options, futures and forward contracts) derived with respect to its business of investing in such shares, securities or currencies and (ii) net income derived from an interest in a “qualified publicly traded partnership” (the “Income Test”). A “qualified publicly traded partnership” is generally defined as a publicly traded partnership under Code Section 7704. Income derived from a partnership (other than a qualified publicly traded partnership) or trust is qualifying income to the extent such income is attributable to items of income of the partnership or trust which would be qualifying income if realized by a Fund in the same manner as realized by the partnership or trust.

If a RIC fails the Income Test and such failure was due to reasonable cause and not willful neglect, generally it will not be subject to the U.S. federal income tax rate applicable to corporations. Instead, the amount of the penalty for non-compliance is U.S. federal corporate income tax on the amount by which the non-qualifying income exceeds one-ninth of the qualifying gross income.

With respect to the asset-diversification requirement, each Fund must diversify its holdings so that, at the end of each quarter of each taxable year (i) at least 50% of the value of the Fund’s total assets are represented by cash and cash items, U.S. government securities, the securities of other RICs and other securities, if such other securities of any one issuer do not represent more than 5% of the value of the Fund’s total assets or more than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of the Fund’s total assets are invested in the securities other than U.S. government securities or the securities of other RICs of (a) one issuer, (b) two or more issuers that are controlled by the Fund and that are engaged in the same, similar or related trades or businesses, or (c) one or more qualified publicly traded partnerships (the “Asset Test”).

If a RIC fails the Asset Test, such RIC has a 6-month period to correct any failure without incurring a penalty if such failure is “de minimis,” meaning that the failure does not exceed the lesser of 1% of the RIC’s assets, or \$10 million.

Similarly, if a RIC fails the Asset Test and the failure is not de minimis, a RIC can cure the failure if: (i) the RIC files with the U.S. Treasury Department a description of each asset that caused the RIC to fail the Asset Test; (ii) the failure is due to reasonable cause and not willful neglect; and (iii) the failure is cured within six months (or such other period specified by the U.S. Treasury Department). In such cases, a tax is imposed on the RIC equal to the greater of: (i) \$50,000 or (ii) an amount determined by multiplying the highest corporate U.S. federal income tax rate (currently 21%) by the amount of net income generated during the period of the Asset Test failure by the assets that caused the RIC to fail the Asset Test.

If a Fund qualifies as a RIC and distributes to its shareholders, for each taxable year, at least 90% of the sum of (i) its “investment company taxable income” as that term is defined in the Internal Revenue Code (which includes, among other things, dividends, taxable interest, the excess of any net short-term capital gains over net long-term capital losses and certain net foreign exchange gains as reduced by certain deductible expenses) without regard to the deduction for dividends paid, and (ii) the excess of its gross tax-exempt interest, if any, over certain deductions attributable to such interest that are otherwise disallowed (the “Distribution Test”), a Fund will be relieved of U.S. federal income tax on any income of a Fund, including long-term capital gains, distributed to shareholders. However, any ordinary income or capital gain retained by a Fund will be subject to regular corporate U.S. federal income tax rates (currently at a maximum rate of 21%). The Funds intend to distribute at least annually substantially all of their investment company taxable income, net tax-exempt interest, and net capital gain.

The Funds will generally be subject to a nondeductible 4% U.S. federal excise tax on the portion of its undistributed ordinary income with respect to each calendar year and undistributed capital gains if it fails to meet certain distribution requirements with respect to the one-year period ending on October 31 in that calendar year. To avoid the 4% U.S. federal excise tax, the required minimum distribution is generally equal to the sum of (i) 98% of the Fund’s ordinary income (computed on a calendar year basis), (ii) 98.2% of the Fund’s capital gain net income (generally computed for the one-year period ending on October 31) and (iii) any income realized, but not distributed, and on which the Fund paid no U.S. federal income tax in preceding years. The Funds generally intend to make distributions in a timely manner in an amount at least equal to the required minimum distribution and therefore, under normal market conditions, does not expect to be subject to this excise tax.

The Funds may be required to recognize taxable income in circumstances in which it does not receive cash. For example, if a Fund holds debt obligations that are treated under applicable U.S. federal income tax rules as having original issue discount (“OID”) (such as debt instruments with payment of kind interest or, in certain cases, with increasing interest rates or that are issued with warrants), the Fund must include in income each year a portion of the OID that accrues over the life of the obligation regardless of whether cash representing such income is received by the Fund in the same taxable year. Because any OID accrued will be included in the Fund’s “investment company taxable income” (discussed above) for the year of accrual, the Fund may be required to make a distribution to its shareholders to satisfy the Distribution Test, even though it will not have received an amount of cash that corresponds with the accrued income.

A RIC is permitted to carry forward net capital losses indefinitely and may allow losses to retain their original character (as short or as long-term). These capital loss carryforwards may be utilized in future years to offset net realized capital gains of the Fund, if any, prior to distributing such gains to shareholders.

Except as set forth below in “Failure to Qualify as a RIC,” the remainder of this discussion assumes that the Funds will qualify as a RIC for each taxable year.

Failure to Qualify as a RIC. If the Fund is unable to satisfy the Distribution Test or otherwise fails to qualify as a RIC in any year, they will be subject to corporate U.S. federal income tax on all of its income and gain, regardless of whether or not such income was distributed. Distributions to the Fund’s shareholders of such income and gain will not be deductible by the Fund in computing its taxable income. In such event, the Fund’s distributions, to the extent derived from the Fund’s current or accumulated earnings and profits, would constitute ordinary dividends, which would generally be eligible for the dividends received deduction available to corporate U.S. shareholders, and non-corporate U.S. shareholders would generally be able to treat such distributions as “qualified dividend income” eligible for preferential rates of U.S. federal income taxation, if holding period and other requirements are satisfied.

Distributions in excess of the Fund’s current and accumulated earnings and profits would be treated first as a return of capital to the extent of the shareholders’ tax basis in their shares of the Fund, and any remaining distributions would be treated as a capital gain. To qualify as a RIC in a subsequent taxable year, the Fund would be required to satisfy the Income Test, Asset Test, and Distribution Test for that year and distribute any earnings and profits from any year in which the Fund failed to qualify for tax treatment as a RIC. Subject to a limited exception applicable to RICs that qualified as such under the Code for at least one year prior to disqualification and that requalify as a RIC no later than the second year following the nonqualifying year, the Fund would be subject to tax on any unrealized built-in gains in the assets held by it during the period in which the Fund failed to qualify for tax treatment as a RIC that are recognized within the subsequent 10 years, unless the Fund made a special election to pay corporate-level tax on such built-in gain at the time of its requalification as a RIC.

Taxation for U.S. Shareholders. Distributions paid to U.S. shareholders by the Fund from its investment company taxable income (which is, generally, the Fund’s ordinary income plus net realized short-term capital gains in excess of net realized long-term capital losses) are generally taxable to U.S. shareholders as ordinary income to the extent of the Fund’s earnings and profits, whether paid in cash or reinvested in additional Shares. Such distributions (if designated by the Fund) may qualify (i) for the dividends received deduction in the case of corporate U.S. shareholders to the extent that the Fund’s income consists of dividend income from U.S. corporations, excluding distributions from tax-exempt organizations, exempt farmers’ cooperatives or REITs or (ii) in the case of individual U.S. shareholders, as qualified dividend income eligible to be taxed at preferential rates to the extent that the Fund receives qualified dividend income, and provided in each case certain holding period and other requirements are met. Qualified dividend income is, in general, dividend income from taxable domestic corporations and qualified foreign corporations (which generally include foreign corporations incorporated in a possession of the United States or in certain countries with a qualified comprehensive income tax treaty with the United States, or the stock with respect to which such dividend is paid is readily tradable on an established securities market in the United States). A qualified foreign corporation generally excludes any foreign corporation, which for the taxable year of the corporation in which the dividend was paid, or the preceding taxable year, is a passive foreign investment company (“PFIC”). Distributions made to a U.S. shareholder from an excess of net long-term capital gains over net short-term capital losses (“Capital Gain Dividends”), including Capital Gain Dividends credited to such U.S. shareholder but retained by the Fund, are taxable to such shareholder as long-term capital gain if they have been properly designated by the Fund, regardless of the length of time such U.S. shareholder owned the shares of the Fund. The maximum tax rate on Capital Gain Dividends received by individuals is generally 20%. Distributions in excess of the Fund’s earnings and profits will be treated by the U.S. shareholder, first, as a tax-free return of capital, which is applied against and will reduce the adjusted tax basis of the U.S. shareholder’s Shares and, after such adjusted tax basis is reduced to zero, will constitute capital gain to the U.S. shareholder. The Fund is not required to provide written notice designating the amount of

any qualified dividend income or capital gain dividends and other distributions. The Forms 1099 sent to the U.S. shareholders will instead serve this notice purpose.

As a RIC, the Fund will be subject to the AMT, but any items that are treated differently for AMT purposes must be apportioned between the Fund and the shareholders and this may affect the U.S. shareholders' AMT liabilities. The Fund intends in general to apportion these items in the same proportion that dividends paid to each shareholder bear to the Fund's taxable income, determined without regard to the dividends paid deduction.

For purpose of determining (i) whether the Distribution Test is satisfied for any year and (ii) the amount of Capital Gain Dividends paid for that year, the Fund may, under certain circumstances, elect to treat a dividend that is paid during the following taxable year as if it had been paid during the prior taxable year. If the Fund makes such an election, a U.S. shareholder will still be treated as receiving the dividend in the taxable year in which the distribution is made. However, any dividend declared by the Fund in October, November or December of any calendar year, payable to shareholders of record on a specified date in such a month and actually paid during January of the following year, will be treated as if it had been received by a U.S. shareholders on December 31 of the year in which the dividend was declared.

The Fund intends to distribute all realized capital gains, if any, at least annually. If, however, the Fund were to retain any net capital gain, the Fund may designate the retained amount as undistributed capital gains in a notice to shareholders who, if subject to U.S. federal income tax on long-term capital gains, (i) will be required to include in income as long-term capital gain, their proportionate shares of such undistributed amount, and (ii) will be entitled to credit their proportionate shares of the U.S. federal income tax paid by the Fund on the undistributed amount against their U.S. federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. If such an event occurs, the tax basis of Shares owned will, for U.S. federal income tax purposes, generally be increased by the difference between the amount of undistributed net capital gain included in the shareholder's gross income and the tax deemed paid by the shareholder.

Sales of Shares or redemption of Creation Units and other dispositions of the Shares, such as exchanges, of the Fund generally are taxable events. U.S. shareholders should consult their own tax advisers with reference to their individual circumstances to determine whether any particular transaction in the Shares is properly treated as a sale or exchange for U.S. federal income tax purposes, as the following discussion assumes, and the tax treatment of any gains or losses recognized in such transactions. The sale of Shares or redemption of Creation Units or other disposition of Shares will generally result in capital gain or loss to a U.S. shareholder equal to the difference between the amount realized and the adjusted tax basis in the Shares sold or exchanged, and will be long-term capital gain or loss if the Shares have been held for more than one year at the time of sale. Any loss upon the sale or exchange of Shares held for six months or less will be treated as long-term capital loss to the extent of any Capital Gain Dividends received (including amounts credited as an undistributed Capital Gain Dividends by such shareholder with respect to such Shares. A loss realized on a sale or exchange of Shares generally will be disallowed if other substantially identical shares are acquired within a 61-day period beginning 30 days before and ending 30 days after the date that the Shares are disposed. In such case, the basis of the Shares acquired will be adjusted to reflect the disallowed loss. Both long-term and short-term capital gain of U.S. corporations are taxed at the rates applicable to ordinary income of corporations. For non-corporate U.S. taxpayers, short-term capital gain will currently be taxed at the rate applicable to ordinary income, while long-term capital gain is taxed at a maximum rate of 20%. Capital losses are subject to certain limitations.

An Authorized Participant who exchanges securities for Creation Units generally will recognize gain or loss from the exchange. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's

aggregate basis in the securities surrendered plus the amount of cash paid for such Creation Units. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units and the exchanger's basis in the Creation Units. The IRS, however, may assert that an Authorized Participant which does not mark-to-market its holdings may not be permitted to currently deduct losses realized upon an exchange of securities for Creation Units under the rules governing "wash sales," or on the basis that there has been no significant change in economic position.

Any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held for more than one year. Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if the Shares comprising the Creation Units have been held for more than one year. Otherwise, such capital gains or losses will be treated as short-term capital gains or losses. Any loss realized upon a redemption of Creation Units held for six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions to the applicable Authorized Participant of long-term capital gains with respect to the Creation Units (including any amounts credited to the Authorized Participant as undistributed capital gains).

Each Fund has the right to reject an order for a purchase of Shares if the purchaser (or group of purchasers) would, upon obtaining the Shares so ordered, own 80% or more of the outstanding Shares of the Fund and if, pursuant to Code Section 351, the Fund would have a basis in the securities deposited for such Shares different from the market value of such securities on the date of deposit. The Trust also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination. If the Fund does issue Creation Units to a purchaser (or group of purchasers) that would, upon obtaining the Shares so ordered, own 80% or more of the outstanding Shares of the Fund, the purchaser (or group of purchasers) may not recognize gain or loss upon the exchange of securities for Creation Units.

Persons purchasing or redeeming Creation Units should consult their own tax advisers with respect to the tax treatment of any creation or redemption transaction and whether the wash sales rules apply and when a loss might be deductible.

The Funds are required to report their shareholders' cost basis, gain/loss, and holding period for Shares to the IRS on the Fund's shareholders' Consolidated Form 1099s.

The Fund has chosen average cost as the standing (default) tax lot identification method for all shareholders. A tax lot identification method is the way the Fund will determine which specific Shares are deemed to be sold when there are multiple purchases on different dates at differing net asset values, and the entire position is not sold at one time. The Fund's standing tax lot identification method is the method Shares will be reported on a U.S. shareholder's Consolidated Form 1099 if the shareholder does not select a specific tax lot identification method. U.S. shareholders may choose a method different than the Fund's standing method and will be able to do so at the time of a U.S. shareholder's purchase or upon the sale of Shares.

The Funds are not responsible for the reliability or accuracy of the information for those securities that are not "covered." The Funds and their service providers do not provide tax advice. U.S. shareholders should consult independent sources, which may include a tax professional, with respect to any decisions they may make with respect to choosing a tax lot identification method.

Certain U.S. shareholders, including individuals and estates and trusts, will be subject to an additional 3.8% Medicare tax on all or a portion of their "net investment income," which should include dividends from the Funds and net gains from the disposition of Shares. U.S. shareholders are

urged to consult their own tax advisers regarding the implications of the additional Medicare tax resulting from an investment in the Funds.

Straddles. When the Funds enter into an offsetting position to limit the risk on another position, the “straddle” rules usually come into play. An option or other position entered into or held by a Fund in conjunction with any other position held by the Fund may constitute a “straddle” for U.S. federal income tax purposes. In general, straddles are subject to certain rules that may affect the character and timing of the Fund’s gains and losses with respect to straddle positions. The key features of the straddle rules are as follows:

The Funds may have to wait to deduct any losses. If a Fund has a capital gain in one position of a straddle and a capital loss in the other, the Fund may not recognize the loss for U.S. federal income tax purposes until the Fund disposes of both positions. This might occur, for example, if the Fund had a highly appreciated stock position and the Fund purchased protective put options (which give the Fund the right to sell the stock to someone else for a period of time at a predetermined price) to offset the risk. If the stock continued to increase in value and the put options expired worthless, the Fund must defer recognition of the loss on its put options until the Fund sells and recognizes the gain on the original, appreciated position.

A Fund’s capital gain holding period may get clipped. The moment the Fund enters into a typical straddle, the capital gains holding period on its offsetting positions is frozen. If the Fund held the original position for one year or less (thus not qualifying for the long-term capital gains rate), not only is the holding period frozen, it starts all over again when the Fund disposes of the offsetting position.

Losses recognized with respect to certain straddle positions that would otherwise constitute short-term capital losses may be treated as long-term capital losses. This generally has the effect of reducing the tax benefit of such losses.

The Funds may not be able to deduct any interest expenses or carrying charges. During the offsetting period, any interest or carrying charges associated with the straddle are not currently tax deductible, but must be capitalized (added to cost basis).

Original Issue Discount, Pay-In-Kind Securities, Market Discount and Commodity-Linked Notes. Some debt obligations with a fixed maturity date of more than one year from the date of issuance that may be acquired by a Fund may be treated as debt obligations that are issued originally at a discount. Generally, the amount of the OID is treated as interest income and is included in the Fund’s taxable income (and required to be distributed by the Fund) over the term of the debt obligation, even though payment of that amount is not received until a later time, upon partial or full repayment or disposition of the debt security.

Some debt obligations that may be acquired by a Fund in the secondary market may be treated as having “market discount.” Very generally, market discount is the excess of the stated redemption price of a debt obligation (or in the case of an obligations issued with OID, its “revised issue price”) over the purchase price of such obligation. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt obligation having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the “accrued market discount” on such debt obligation. Alternatively, a Fund may elect to accrue market discount currently, in which case the Fund will be required to include the accrued market discount in the Fund’s income (as ordinary income) and thus distribute it over the term of the debt security, even though payment of that amount is not received until a later time, upon partial or full repayment or disposition of the debt security. The rate at which the market discount accrues, and thus is included in the Fund’s income, will depend upon which of the permitted accrual methods the Fund elects. In the case of higher-risk securities, the amount of market discount may be unclear. See below under

“Higher-Risk Securities.”

Some debt obligations that may be acquired by a Fund may be treated as having “acquisition discount” (very generally, the excess of the stated redemption price over the purchase price), or OID in the case of certain types of debt obligations. The Fund will be required to include the acquisition discount, or OID, in income (as ordinary income) over the term of the debt obligation, even though payment of that amount is not received until a later time, upon partial or full repayment or disposition of the debt security. The Fund may make one or more of the elections applicable to debt obligations having acquisition discount, or OID, which could affect the character and timing of recognition of income.

In addition, payment-in-kind securities will, and commodity-linked notes may, give rise to income that is required to be distributed and is taxable even though the Fund receives no interest payment in cash on the security during the year.

If a Fund holds the foregoing kinds of securities, it may be required to pay out as an income distribution each year an amount that is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the Fund or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). The Fund may realize gains or losses from such liquidations. In the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution than they would in the absence of such transactions.

Higher-Risk Securities. To the extent such investments are permissible for a Fund, the Fund may invest in debt obligations that are in the lowest rating categories or are unrated, including debt obligations of issuers not currently paying interest or who are in default. Investments in debt obligations that are at risk of or in default present special tax issues for the Fund. Tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, OID or market discount, when and to what extent deductions may be taken for bad debts or worthless securities and how payments received on obligations in default should be allocated between principal and income. In limited circumstances, it may also not be clear whether the Fund should recognize market discount on a debt obligation, and if so, what amount of market discount the Fund should recognize. These and other related issues will be addressed by the Fund when, as and if it invests in such securities, in order to seek to ensure that it distributes sufficient income to preserve its status as a RIC and does not become subject to U.S. federal income or excise tax.

Issuer Deductibility of Interest. A portion of the interest paid or accrued on certain high yield discount obligations owned by a Fund may not be deductible to (and thus, may affect the cash flow of) the issuer. If a portion of the interest paid or accrued on certain high yield discount obligations is not deductible, that portion will be treated as a dividend for purposes of the corporate dividends-received deduction. In such cases, if the issuer of the high yield discount obligations is a domestic corporation, dividend payments by the Fund may be eligible for the dividends-received deduction to the extent of the deemed dividend portion of such accrued interest.

Interest paid on debt obligations owned by a Fund, if any, that are considered for U.S. federal income tax purposes to be payable in the equity of the issuer or a related party will not be deductible to the issuer, possibly affecting the cash flow of the issuer.

Tax-Exempt Shareholders. A tax-exempt U.S. shareholder could recognize unrelated taxable business income (“UBTI”) by virtue of its investment in a Fund if Shares constitute debt-financed property in the hands of the tax-exempt U.S. shareholder within the meaning of Code Section 514(b). Furthermore, a tax-exempt U.S. shareholder may recognize UBTI if the Fund recognize “excess inclusion income” derived from direct or indirect investments in residual interests in real estate mortgage investment conduits (“REMICs”) or equity interests in taxable mortgage pools (“TMPs”) if the amount of such income recognized by the Fund exceeds the Fund’s investment company taxable income (after taking into account deductions for dividends paid by the Fund).

In addition, special tax consequences apply to charitable remainder trusts (“CRTs”) that invest in RICs that invest directly or indirectly in residual interests in REMICs or equity interests in TMPs. A CRT (as defined in Code Section 664) that realizes any UBTI for a taxable year, must pay an excise tax annually of an amount equal to such UBTI. Under IRS guidance issued in October 2006, a CRT will not recognize UBTI solely as a result of investing in a Fund that recognize “excess inclusion income.” Rather, if at any time during any taxable year a CRT (or one of certain other tax-exempt shareholders, such as the United States, a state or political subdivision, or an agency or instrumentality thereof, and certain energy cooperatives) is a record holder of a Share that recognize “excess inclusion income,” then the Fund will be subject to a tax on that portion of its “excess inclusion income” for the taxable year that is allocable to such shareholders, at the highest U.S. federal corporate income tax rate. The extent to which this IRS guidance remains applicable. To the extent permitted under the 1940 Act, a Fund may elect to specially allocate any such tax to the applicable CRT, or other shareholder, and thus reduce such shareholder’s distributions for the year by the amount of the tax that relates to such shareholder’s interest in the Fund. The Funds have not yet determined whether such an election will be made. CRTs and other tax-exempt investors are urged to consult their own tax advisers concerning the consequences of investing in the Funds.

Foreign Taxation. Income received by a Fund from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax conventions between certain countries and the United States may reduce or eliminate such taxes.

A “qualified fund of funds” is a RIC that has at least 50% of the value of its total interests invested in other RICs at the end of each quarter of the taxable year. If a Fund satisfies this requirement or if it meets certain other requirements, which include a requirement that more than 50% of the value of the Fund’s total assets at the close of its taxable year consist of stocks or securities of foreign corporations, then the Fund should be eligible to file an election with the IRS that may enable its shareholders to receive either the benefit of a foreign tax credit, or a tax deduction, with respect to any foreign and U.S. possessions income taxes paid by the Fund, subject to certain limitations.

Non-U.S. Shareholders. Capital Gain Dividends are generally not subject to withholding of U.S. federal income tax. Absent a specific statutory exemption, dividends other than Capital Gain Dividends paid by a Fund to a Non-U.S. shareholder are subject to withholding of U.S. federal income tax at a rate of 30% (or lower applicable treaty rate) even if they are funded by income or gains (such as portfolio interest, short-term capital gains, or foreign-source dividend and interest income) that, if paid to a foreign person directly, would not be subject to withholding.

A RIC is not required to withhold any amounts (i) with respect to distributions (other than distributions to a Non-U.S. shareholder (a) that does not provide a satisfactory statement that the beneficial owner is not a U.S. person, (b) to the extent that the dividend is attributable to certain interest on an obligation if the Non-U.S. shareholder is the issuer or is a 10% shareholder of the issuer, (c) that is within a foreign country that has inadequate information exchange with the United States, or (d) to the extent the dividend is attributable to interest paid by a person that is a related person of the Non-U.S. shareholder and the Non-U.S. shareholder is a controlled foreign corporation) from U.S.-source interest income of types similar to those not subject to U.S. federal income tax if

earned directly by an individual Non-U.S. shareholder, to the extent such distributions are properly reported as such by the Fund in a written notice to shareholders (“interest-related dividends”), and (ii) with respect to distributions (other than (a) distributions to an individual Non-U.S. shareholder who is present in the United States for a period or periods aggregating 183 days or more during the year of the distribution and (b) distributions subject to special rules regarding the disposition of U.S. real property interests (“USRPIs”) as described below) of net short-term capital gains in excess of net long-term capital losses to the extent such distributions are properly reported by the RIC (“Short-Term Capital Gain Dividends”). If the Fund invests in an underlying fund that pays such distributions to the Fund, such distributions retain their character as not subject to withholding if properly reported when paid by the Fund to Non-U.S. shareholders.

The Fund is permitted to report such part of its dividends as interest-related or Short-Term Capital Gain Dividends as are eligible, but is not required to do so. These exemptions from withholding will not be available to Non-U.S. shareholders that do not currently report their dividends as interest-related or Short-Term Capital Gain Dividends.

In the case of shares held through an intermediary, the intermediary may withhold even if the Fund reports all or a portion of a payment as an interest-related or Short-Term Capital Gain Dividend to shareholders. Non-U.S. shareholders should contact their intermediaries regarding the application of these rules to their accounts.

A Non-U.S. shareholder generally is not subject to U.S. federal income tax on gains (and is not allowed a deduction for losses) realized on the sale of shares of the Fund or on Capital Gain Dividends unless (i) such gain or dividend is effectively connected with the conduct of a trade or business carried on by such holder within the United States, (ii) in the case of an individual shareholder, the shareholder is present in the United States for a period or periods aggregating 183 days or more during the year of the sale or the receipt of the Capital Gain Dividend and certain other conditions are met, or (iii) the special rules relating to gain attributable to the sale or exchange of USRPIs apply to the Non-U.S. shareholder’s sale of shares of the Fund or to the Capital Gain Dividend received by the non-U.S. shareholder (as described below).

Special rules would apply if the Fund were either a “U.S. real property holding corporation” (“USRPHC”) or would be a USRPHC but for the operation of certain exceptions to the definition thereof. Very generally, a USRPHC is a U.S. corporation that holds USRPIs the fair market value of which equals or exceeds 50% of the sum of the fair market values of the corporation’s USRPIs, interests in real property located outside the United States, and other assets. USRPIs are generally defined as any interest in U.S. real property and any interest (other than solely as a creditor) in a USRPHC or former USRPHC.

If the Fund were a USRPHC or would be a USRPHC but for certain exceptions, any distributions by the Fund to a Non-U.S. shareholder (including, in certain cases, distributions made by the Fund in redemption of its shares) attributable to gains realized by the Fund on the disposition of USRPIs or to distributions received by the Fund from a lower-tier RIC or REIT that the Fund is required to treat as USRPI gain in its hands generally would be subject to U.S. federal income withholding tax. In addition, such distributions could result in a Non-U.S. shareholder being required to file a U.S. federal income tax return and pay tax on the distributions at regular U.S. federal income tax rates. The consequences to a Non-U.S. shareholder, including the rate of such withholding and character of such distributions (*e.g.*, as ordinary income or USRPI gain), would vary depending upon the extent of the Non-U.S. shareholder’s current and past ownership of the Fund. This “look-through” USRPI treatment for distributions by the Fund, if it were either a USRPHC or would be a USRPHC but for the operation of certain exceptions, to Non-U.S. shareholders applies only to those distributions that, in turn, are attributable to distributions received by the Fund from a lower-tier REIT, unless Congress enacts legislation providing otherwise.

In addition, if the Fund were a USRPHC or former USRPHC, it could be required to withhold U.S. federal income tax on the proceeds of a share redemption by a greater-than-5% Non-U.S. shareholder, in which case such shareholder generally would also be required to file U.S. federal income tax returns and pay any additional taxes due in connection with the redemption.

Whether or not the Fund is characterized as a USRPHC will depend upon the nature and mix of the Fund's assets. The Fund does not expect to be a USRPHC. Non-U.S. shareholders should consult their tax advisors concerning the application of these rules to their investment in the Fund.

If a Non-U.S. shareholder has a trade or business in the United States, and the dividends from the Fund are effectively connected with the Non-U.S. shareholder's conduct of that trade or business, the dividend will be subject to U.S. federal net income taxation at regular income tax rates.

If a Non-U.S. shareholder is eligible for the benefits of a tax treaty, any effectively connected income or gain will generally be subject to U.S. federal income tax on a net basis only if it is also attributable to a permanent establishment maintained by that Non-U.S. shareholder in the United States.

To qualify for any exemptions from withholding described above or for lower withholding tax rates under income tax treaties, or to establish an exemption from backup withholding, a Non-U.S. shareholder must comply with special certification and filing requirements relating to its non-US status (including, in general, furnishing an applicable IRS Form W-8). Non-U.S. shareholders should consult their tax advisers in this regard.

A Non-U.S. shareholder may be subject to U.S. state and local tax and to the U.S. federal estate tax in addition to the U.S. federal income tax referred to above.

Backup Withholding. Each Fund generally is required to backup withhold and remit to the U.S. Treasury Department a percentage of the taxable distributions and redemption proceeds paid to any individual shareholder who fails to properly furnish the Fund with a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to properly certify to the Fund that he or she is not subject to such withholding. The backup withholding tax rate is currently 24%.

Backup withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability, provided the appropriate information is furnished to the IRS.

Tax Shelter Reporting Regulations. If a shareholder recognizes a loss with respect to the Shares of \$2 million or more for an individual U.S. shareholder or \$10 million or more for a corporate U.S. shareholder, the U.S. shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all RICs. The fact that a loss is reportable does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. U.S. shareholders should consult their tax own advisers to determine the applicability of this requirement in light of their individual circumstances.

FATCA. Payments to a shareholder that is either a foreign financial institution ("FFI") or a non-financial foreign entity ("NFFE") within the meaning of the Foreign Account Tax Compliance Act ("FATCA") may be subject to a generally nonrefundable 30% withholding tax on: (i) income dividends paid by the Fund and (ii) possibly in the future, certain capital gain distributions and the proceeds arising from the sale of Shares paid by the Fund. FATCA withholding tax generally can be avoided: (i) by an FFI, subject to any applicable intergovernmental agreement or other exemption, if

it enters into a valid agreement with the IRS to, among other requirements, report required information about certain direct and indirect ownership of foreign financial accounts held by U.S. persons with the FFI and (ii) by an NFFE, if it: (a) certifies that it has no substantial U.S. persons as owners or (b) if it does have such owners, reports information relating to them. The Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign entity that is a shareholder of the Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA, generally on an applicable IRS Form W-8.

Shares Purchased through Tax-Qualified Plans. Special tax rules apply to investments through defined contribution plans and other tax-qualified plans. Shareholders should consult their tax advisors to determine the suitability of Shares as an investment through such plans, and the precise effect of an investment on their particular tax situation.

Possible Tax Law Changes. At the time that this SAI was being prepared, various administrative and legislative changes to the U.S. federal tax laws are under consideration, but it is not possible at this time to determine whether any of these changes will take place or what the changes might entail.

The foregoing is a general and abbreviated summary of the provisions of the Code and the Treasury regulations in effect as they directly govern the taxation of the Funds and their shareholders. These provisions are subject to change by legislative and administrative action, and any such change may be retroactive. Shareholders are urged to consult their tax advisers regarding specific questions as to U.S. federal income, estate or gift taxes, or foreign, state, local taxes or other taxes.

BROKERAGE ALLOCATION AND OTHER PRACTICES

Brokerage Transactions. Generally, equity securities are bought and sold through brokerage transactions for which commissions are payable. Purchases from underwriters will include the underwriting commission or concession, and purchases from dealers serving as market makers will include a dealer's mark-up or reflect a dealer's mark-down. The purchase price for securities bought from dealers serving as market makers will similarly include the dealer's mark up or reflect a dealer's mark down. When a Fund executes transactions in the over-the-counter market, it will generally deal with primary market makers unless prices that are more favorable are otherwise obtainable.

In selecting brokers and dealers to execute portfolio transactions, the Adviser may consider research and brokerage services furnished to the Adviser or its affiliates. The Adviser may not consider sales of shares of the Funds as a factor in the selection of brokers and dealers, but may place portfolio transactions with brokers and dealers that promote or sell a Fund's shares so long as such transactions are done in accordance with the policies and procedures established by the Trustees that are designed to ensure that the selection is based on the quality of execution and not on sales efforts. When placing portfolio transactions with a broker or dealer, the Adviser may aggregate securities to be sold or purchased for the Funds with those to be sold or purchased for other advisory accounts managed by the Adviser. In aggregating such securities, the Adviser will average the transaction as to price and will allocate available investments in a manner that the Adviser believes to be fair and reasonable to the Funds and such other advisory accounts. An aggregated order will generally be allocated on a pro rata basis among all participating accounts, based on the relative dollar values of the participating accounts, or using any other method deemed to be fair to the participating accounts, with any exceptions to such methods involving the Trust being reported to the Trustees.

Section 28(e) of the 1934 Act permits the Adviser, under certain circumstances, to cause the Funds to pay a broker or dealer a commission for effecting a transaction in excess of the amount of commission another broker or dealer would have charged for effecting the transaction in recognition

of the value of brokerage and research services provided by the broker or dealer. In addition to agency transactions, the Adviser may receive brokerage and research services in connection with certain riskless principal transactions, in accordance with applicable SEC guidance. Brokerage and research services include: (1) furnishing advice as to the value of securities, the advisability of investing in, purchasing or selling securities, and the availability of securities or purchasers or sellers of securities; (2) furnishing analyses and reports concerning issuers, industries, securities, economic factors and trends, Fund strategy, and the performance of accounts; and (3) effecting securities transactions and performing functions incidental thereto (such as clearance, settlement, and custody). In the case of research services, the Adviser believes that access to independent investment research is beneficial to its investment decision-making processes and, therefore, to the Funds.

To the extent that research services may be a factor in selecting brokers, such services may be in written form or through direct contact with individuals and may include information as to particular companies and securities as well as market, economic, or institutional areas and information which assists in the valuation and pricing of investments. Examples of research-oriented services for which the Adviser might utilize Fund commissions include research reports and other information on the economy, industries, sectors, groups of securities, individual companies, statistical information, political developments, technical market action, pricing and appraisal services, credit analysis, risk measurement analysis, performance and other analysis. The Adviser may use research services furnished by brokers in servicing all client accounts and not all services may necessarily be used in connection with the account that paid commissions to the broker providing such services. Information so received by the Adviser will be in addition to and not in lieu of the services required to be performed by the Adviser under its advisory agreement. Any advisory or other fees paid to the Adviser are not reduced as a result of the receipt of research services.

In some cases the Adviser may receive a service from a broker that has both a "research" and a "non-research" use. When this occurs, the Adviser makes a good faith allocation, under all the circumstances, between the research and non-research uses of the service. The percentage of the service that is used for research purposes may be paid for with client commissions, while the Adviser will use its own funds to pay for the percentage of the service that is used for non-research purposes. In making this good faith allocation, the Adviser faces a potential conflict of interest, but the Adviser believes that its allocation procedures are reasonably designed to ensure that it appropriately allocates the anticipated use of such services to their research and non-research uses.

From time to time, the Funds may purchase new issues of securities in a fixed price offering. In these situations, the seller may be a member of the selling group that will, in addition to selling securities, provide the Adviser with research services. FINRA has adopted rules expressly permitting these types of arrangements under certain circumstances. Generally, the seller will provide research "credits" in these situations at a rate that is higher than that which is available for typical secondary market transactions. These arrangements may not fall within the safe harbor of Section 28(e).

Brokerage with Fund Affiliates. The Funds may execute brokerage or other agency transactions through registered broker-dealer affiliates of the Fund, the Adviser for a commission in conformity with the 1940 Act, the 1934 Act and rules promulgated by the SEC. These rules further require that commissions paid to the affiliate by the Funds for exchange transactions not exceed "usual and customary" brokerage commissions. The rules define "usual and customary" commissions to include amounts which are "reasonable and fair compared to the commission, fee or other remuneration received or to be received by other brokers in connection with comparable transactions involving similar securities being purchased or sold on a securities exchange during a comparable period of time." The Trustees, including those who are not "interested persons" of the Funds, have adopted procedures for evaluating the reasonableness of commissions paid to affiliates and review these procedures periodically.

Securities of "Regular Broker-Dealers". Each Fund is required to identify any securities of its "regular brokers and dealers" (as such term is defined in the 1940 Act) which the Fund may hold at the close of its most recent fiscal year. Each Fund is newly formed and has not commenced operations as of the date of this SAI.

DISCLOSURE OF PORTFOLIO SECURITIES HOLDINGS

On each Business Day (as defined in the Creation and Redemption of Creation Units section of this SAI), prior to the opening of regular trading on the Funds' primary listing exchange, the Funds disclose on their website (www.rexshares.com) certain information relating to the portfolio holdings that will form the basis of the Funds' next net asset value per share calculation.

In addition, certain information may also be made available to certain parties:

- **Communications of Data Files:** Each Fund may make available through the facilities of the National Securities Clearing Corporation ("NSCC") or through posting on the Fund's website, prior to the opening of trading on each business day, a list of the Fund's holdings (generally pro-rata) that Authorized Participants could deliver to the Fund to settle purchases of the Fund (i.e. Deposit Securities) or that Authorized Participants would receive from the Fund to settle redemptions of the Fund (i.e. Fund Securities). These files are known as the Portfolio Composition Files and the Fund Data Files (collectively, "Files"). The Files are applicable for the next trading day and are provided to the NSCC and/or posted on the Funds' website after the close of markets in the U.S.
- **Communications with Authorized Participants and Liquidity Providers:** Certain employees of the Adviser, Distributor and Custodian are responsible for interacting with Authorized Participants and liquidity providers with respect to discussing custom basket proposals as described in the Custom Baskets section of this SAI. As part of these discussions, these employees may discuss with an Authorized Participant or liquidity provider the securities each Fund is willing to accept for a creation, and securities that the Fund will provide on a redemption.
- **The Adviser may also discuss portfolio holdings-related information with broker/dealers, in connection with settling each Fund's transactions, as may be necessary to conduct business in the ordinary course in a manner consistent with the disclosure in the Funds' current registration statement.**
- **Communications with Listing Exchanges:** From time to time, employees of the Adviser, Distributor and/or Custodian may discuss portfolio holdings information with the applicable primary listing exchange for the Funds as needed to meet the exchange listing standards.
- **Communication of Other Information:** Certain explanatory information regarding the Files is released to Authorized Participants and liquidity providers on a daily basis, but is only done so after the Files are posted to the Funds' website.
- **Third-Party Service Providers:** Certain portfolio holdings information may be disclosed to the Trustees and their counsel, outside counsel for the Funds, auditors and to certain third-party service providers (i.e., fund administrator, custodian, proxy voting service, and printers), as may be necessary to conduct business in the ordinary course in a manner consistent with applicable policies, agreements with the Funds, the terms of the current registration statement and federal securities laws and regulations thereunder.
- **Each Fund files its complete portfolio holdings schedule with the SEC on a quarterly basis.**

This schedule is filed with the Trust's annual and semi-annual reports on Form N-CSR for the second and fourth fiscal quarters and on Form N-PORT for the first and third fiscal quarters. Certain portfolio information is also included on Form N-PORT that is filed for the second and fourth fiscal quarters. The portfolio holdings information provided in these reports is as of the end of the respective quarter. Form N-CSR must be filed with the SEC no later than ten (10) calendar days after the Trust transmits its annual or semi-annual report to its shareholders. Form N-PORT must be filed with the SEC and will be made publicly available no later than sixty (60) calendar days after the end of the applicable quarter.

No consideration may be received by the Funds, the Adviser, or any other person in connection with the disclosure of portfolio information. The Trust's Chief Compliance Officer or his or her delegate may authorize disclosure of portfolio holdings information pursuant to the above policy and procedures, subject to restrictions on selective disclosure imposed by applicable law. The Board reviews the policy and procedures for disclosure of portfolio holdings information at least annually.

DESCRIPTION OF SHARES

The Trust's Agreement and Declaration of Trust authorizes the Board to issue an unlimited number of full and fractional shares of beneficial interest in the Trust and to classify or reclassify any unissued shares into one or more series of shares. The Agreement and Declaration of Trust further authorizes the trustees to classify or reclassify any series of shares into one or more classes. The Trust's shares of beneficial interest have no par value.

Each Fund is authorized to issue one class of shares imposing no front-end or deferred sales charges, no 12b-1 fee and no service fee.

Shares have no preemptive rights and only such conversion or exchange rights as the Board may grant in its discretion. When issued for payment as described in the applicable prospectus, shares will be fully paid and non-assessable. In the event of a liquidation or dissolution of the Trust or an individual fund, shareholders of a fund are entitled to receive the assets available for distribution belonging to the particular fund, and a proportionate distribution, based upon the relative asset values of the respective fund, of any general assets of the Trust not belonging to any particular fund which are available for distribution.

Shareholders are entitled to one vote for each full share held, and a proportionate fractional vote for each fractional share held and will vote in the aggregate and not by class, except as otherwise expressly required by law or when the Board determines that the matter to be voted on affects only the interests of shareholders of a particular class. Voting rights are not cumulative and, accordingly, the holders of more than 50% of the aggregate of the Trust's outstanding shares may elect all of the trustees, irrespective of the votes of other shareholders.

Rule 18f-2 under the 1940 Act provides that any matter required to be submitted to the holders of the outstanding voting securities of an investment company such as the Trust shall not be deemed to have been effectively acted upon unless approved by the holders of a majority of the outstanding shares of each fund affected by the matter. A particular fund is deemed to be affected by a matter unless it is clear that the interests of each fund in the matter are substantially identical or that the matter does not affect any interest of the fund. Under the Rule, the approval of an investment management agreement or any change in an investment objective, if fundamental, or in a fundamental investment policy would be effectively acted upon with respect to a fund only if approved by a majority of the outstanding shares of such fund. However, the Rule also provides that the ratification of the appointment of independent public accountants, the approval of principal underwriting contracts and the election of trustees may be effectively acted upon by shareholders of the Trust voting without regard to series or class.

The Trust does not presently intend to hold annual meetings of shareholders except as required by the 1940 Act or other applicable law. Upon the written request of shareholders owning at least 25% of the Trust's shares, the Trust will call for a meeting of shareholders to consider the removal of one or more trustees and other certain matters. To the extent required by law, the Trust will assist in shareholder communication in such matters.

The Board has full power and authority, in its sole discretion, and without obtaining shareholder approval, to divide or combine the shares of any class or series thereof into a greater or lesser number, to classify or reclassify any issued shares or any class or series thereof into one or more classes or series of shares, and to take such other action with respect to the Trust's shares as the Board may deem desirable. The Agreement and Declaration of Trust authorizes the Trustees, without shareholder approval, to cause the Trust to merge or to consolidate with any corporation, association, trust or other organization in order to change the form of organization and/or domicile of the Trust or to sell or exchange all or substantially all of the assets of the Trust, or any series or class thereof, in dissolution of the Trust, or any series or class thereof. The Agreement and Declaration of Trust permits the termination of the Trust or of any series or class of the Trust by the Trustees without shareholder approval. However, the exercise of such authority by the Board without shareholder approval may be subject to certain restrictions or limitations under the 1940 Act.

PROXY VOTING

The Board of Trustees of the Trust has delegated responsibility for decisions regarding proxy voting for securities held by each Fund to the Adviser. The Adviser will vote such proxies in accordance with its proxy voting policies and procedures, which are included in Exhibit B to this SAI. The Board of Trustees will periodically review each Fund's proxy voting record. The proxy voting policies and procedures of the Trust are included as Exhibit A to this SAI.

The Trust is required to disclose annually each Fund's complete proxy voting record on Form N-PX. Any material changes to the proxy policies and procedures will be submitted to the Board for approval. Information regarding how each Fund voted proxies relating to portfolio securities for the most recent 12-month period ending June 30, will be available (1) without charge, upon request by calling 833-759-6110 or by writing to the Fund at 8730 Stony Point Parkway, Suite 205, Richmond, Virginia 23235; (2) or through the Fund's website at www.rexshares.com; and (3) on the SEC's Internet website at <http://www.sec.gov>.

CODES OF ETHICS

The Board of Trustees, on behalf of the Trust, has adopted a Code of Ethics pursuant to Rule 17j-1 under the 1940 Act. In addition, the Adviser and the Administrator have each adopted Codes of Ethics pursuant to Rule 17j-1. These Codes of Ethics apply to the personal investing activities of trustees, officers and certain employees ("access persons"). Rule 17j-1 and the Codes of Ethics are designed to prevent unlawful practices in connection with the purchase or sale of securities by access persons. Under each Code of Ethics, access persons are permitted to engage in personal securities transactions, but are required to report their personal securities transactions for monitoring purposes. The personnel subject to the Codes are permitted to invest in securities, including securities that may be purchased or held by the Funds. In addition, certain access persons are required to obtain approval before investing in initial public offerings or private placements, or are prohibited from making such investments. Copies of these Codes of Ethics are on file with the SEC, and are available to the public on the EDGAR Database on the SEC's Internet website at <http://www.sec.gov>.

FINANCIAL STATEMENTS

The Funds are new and do not have audited financial statements at this time. Upon completion of the Funds' first fiscal period/year, audited financial statements will become available.

EXHIBIT A

ETF OPPORTUNITIES TRUST

PROXY VOTING POLICY AND PROCEDURES

The ETF Opportunities Trust (the “Trust”) is registered as an open-end management investment company under the Investment Company Act of 1940, as amended (“1940 Act”). The Trust offers multiple series (each a “Fund” and, collectively, the “Funds”). Consistent with its fiduciary duties and pursuant to Rule 30b1-4 under the 1940 Act (the “Proxy Rule”), the Board of Trustees of the Trust (the “Board”) has adopted this proxy voting policy on behalf of the Trust (the “Policy”) to reflect its commitment to ensure that proxies are voted in a manner consistent with the best interests of the Funds’ shareholders.

Delegation of Proxy Voting Authority to Fund Advisers

The Board believes that the investment adviser, or the investment sub-adviser as appropriate, of each Fund (each an “Adviser”), as the entity that selects the individual securities that comprise its Fund’s portfolio, is the most knowledgeable and best-suited to make decisions on how to vote proxies of portfolio companies held by that Fund. The Trust shall therefore defer to, and rely on, the Adviser of each Fund to make decisions on how to cast proxy votes on behalf of such Fund.

The Trust hereby designates the Adviser of each Fund as the entity responsible for exercising proxy voting authority with regard to securities held in the Fund’s investment portfolio. Consistent with its duties under this Policy, each Adviser shall monitor and review corporate transactions of corporations in which the Fund has invested, obtain all information sufficient to allow an informed vote on all proxy solicitations, ensure that all proxy votes are cast in a timely fashion, and maintain all records required to be maintained by the Fund under the Proxy Rule and the 1940 Act. Each Adviser shall perform these duties in accordance with the Adviser’s proxy voting policy, a copy of which shall be presented to this Board for its review. Each Adviser shall promptly provide to the Board updates to its proxy voting policy as they are adopted and implemented.

Conflict of Interest Transactions

In some instances, an Adviser may be asked to cast a proxy vote that presents a conflict between the interests of a Fund’s shareholders and those of the Adviser or an affiliated person of the Adviser. In such case, the Adviser is instructed to abstain from making a voting decision and to forward all necessary proxy voting materials to the Trust to enable the Board to make a voting decision. When the Board is required to make a proxy voting decision, only the Trustees without a conflict of interest with regard to the security in question or the matter to be voted upon shall be permitted to participate in the decision of how the Fund’s vote will be cast. In the event that the Board is required to vote a proxy because an Adviser has a conflict of interest with respect to the proxy, the Board will vote such proxy in accordance with the Adviser’s proxy voting policy, to the extent consistent with the shareholders’ best interests, as determined by the Board in its discretion. The Board shall notify the Adviser of its final decision on the matter and the Adviser shall vote in accordance with the Board’s decision.

Availability of Proxy Voting Policy and Records Available to Fund Shareholders

If a Fund has a website, the Fund may post a copy of its Adviser's proxy voting policy and this Policy on such website. A copy of such policies and of each Fund's proxy voting record shall also be made available, without charge, upon request of any shareholder of the Fund, by calling the applicable Fund's toll-free telephone number as printed in the Fund's prospectus. The Trust's administrator shall reply to any Fund shareholder request within three business days of receipt of the request, by first-class mail or other means designed to ensure equally prompt delivery.

Each Adviser shall provide a complete voting record, as required by the Proxy Rule, for each series of the Trust for which it acts as adviser, to the Trust's administrator within 30 days following the end of each 12-month period ending June 30. The Trust's administrator will file a report based on such record on Form N-PX on an annual basis with the U.S. Securities and Exchange Commission no later than August 31st of each year.

Adopted: December 4, 2019

EXHIBIT B

PROXY VOTING POLICY AND PROCEDURES OF TUTTLE CAPITAL MANAGEMENT, LLC

Proxy Voting

Background

Proxy voting is an important right of investors and reasonable care and diligence must be undertaken to ensure that such rights are properly and timely exercised.

SEC-registered investment advisers that exercise voting authority with respect to client securities, are required by Rule 206(4)-6 of the Advisers Act to (a) adopt and implement written policies and procedures that are reasonably designed to ensure that client securities are voted in the best interests of clients, which must include how an adviser addresses material conflicts that may arise between an adviser's interests and those of its clients; (b) to disclose to clients how they may obtain information from the adviser with respect to the voting of proxies for their securities; (c) to describe to clients a summary of its proxy voting policies and procedures and, upon request, furnish a copy to its clients; and (d) maintain certain records relating to the adviser's proxy voting activities when the adviser does have proxy voting authority.

Policy

TCM, as a matter of policy and as a fiduciary obligation to our clients, maintains the responsibility for voting proxies for portfolio securities held by accounts in which it has discretionary authority unless it delegates such responsibilities to Sub-Advisors. TCM's proxy voting policy must be approved by the Trust(s) Board representatives in connection with registered investment companies (including TCM ETFs) it manages. (Note: See Form N-PX policy for further information concerning TCM's obligations for its registered investment company clients.) TCM must adhere to the Board approved proxy voting policy. TCM has more latitude in regard to proxy voting for non-fund/non-ETF clients but shall follow the same guidelines herein. TCM has delegated sub-adviser oversight and proxy voting matters to its CEO or designee (e.g. Trader) with a retrospective review performed by its Brokerage Committee on a quarterly basis. Where TCM is obligated to exercise proxy voting, the Firm policy is to perform this duty consistent with the best economic interests of our clients. TCM's CEO or designee shall, prior to effectuating a client agreement, make a determination as to the obligation of proxy voting. If the CEO determines that proxy voting is the responsibility of TCM, then the procedures herein shall be followed. In cases where TCM is not obligated to vote proxies, the CEO shall confirm with the client so that both parties have a mutual understanding and, in turn, the CEO will email the CCO as to this fact to have contemporaneous supporting documentation. TCM maintains written policies and procedures as to the handling, research, voting and reporting of proxy voting and makes appropriate disclosures about our Adviser's proxy policies and practices. The Adviser will, at least annually, review its Proxy Voting policy and, where necessary, make enhancements based on the results of such review.

Consequently, for clients in which TCM maintains the proxy voting obligations attendant to other registered investment companies or separately managed account(s) for which TCM is the Adviser or Sub-Adviser, TCM shall adhere to the applicable proxy voting policies in place whether implemented by TCM or the primary investment adviser/sponsor, as may be required. Further, TCM does typically exercise the proxy voting authority for the shares it serves as ETF sub-adviser SMA sub-adviser as the Primary Investment Advisor or SMA Sponsor is typically obligated to carryout this function.

TCM will approach each corporate proxy statement on a case-by-case basis and may vote a proxy in a manner different from management's recommendation. In sum, whereupon TCM is responsible for proxy voting

(inclusive of issuer proposals, corporate actions, and class action lawsuits), the Firm's CEO will consider both sides of each proxy issue and after appropriate evaluation will cast its votes according to the most favorable position.

As a general principle when responsible for proxy voting for clients and, in particular investment companies, the Adviser shall determine how to vote proxies based on our reasonable judgment of that vote insofar as what is most likely to produce favorable financial results for the clients or shareholders. Proxy votes typically will be cast in favor of proposals that maintain or strengthen the shared interests of shareholders and management, increase shareholder value, maintain or increase shareholder influence over the issuer's board of directors and management, and maintain or increase the rights of shareholders. Conversely, proxy votes will be cast against proposals having the opposite effect or in circumstances where (i) the cost of voting such proxy exceeds the expected benefit to the client; (ii) if the proxy authorizes a re-registration process imposing trading and transfer restrictions on the shares, commonly, referred to as "blocking."

In keeping with its fiduciary obligation, TCM and its CEO may not be influenced by outside sources who have interests which conflict with the interests of the Adviser's clients when voting proxies for such clients. Accordingly, our policy and procedures include the responsibility to receive and disclose any potential conflicts of interest and maintaining relevant and required records.

To help ensure that TCM votes proxies in the best interests of the client, the Adviser has established procedures highlighted by guidelines (i.e., best practices) aimed at setting forth practices to be followed by the CEO and to properly deal with a material conflict of interest. As an overarching principle, TCM views its obligations to exercise proxy votes on management and shareholder proposals at publicly traded companies as a means intended to assist institutional investors in circumstances the underlying proposals are guided by promoting long-term shareholder value creation and risk mitigation. Public companies which maintain generally strong corporate governance cultures understand these practices should respect shareholder rights and provide appropriate transparency, taking into account relevant laws, customs, and best practice codes of each market and region, as well as the right and responsibility of shareholders to make informed voting decisions.

From time to time, it is possible that CEO will decide (i) to vote shares held in client accounts differently from the vote of another client account holding the same security. Such actions may result from situations where clients are permitted to place reasonable restrictions on TCM's voting authority in the same manner that they may place such restrictions on the actual selection of account securities; or (ii) to abstain from voting on behalf of client account(s) for good reason. For example, in the absence of specific voting guidelines from the client, TCM will generally NOT vote proxies. If, however, TCM elects to vote in these instances, TCM's policy is to vote all proxies from a specific issuer the same way for each client absent qualifying restrictions from a client. TCM may determine to abstain from voting a proxy if the CEO determines doing so is not in the best interest of the client.

In connection with administrative or clerical matters, such as formally issues proxy votes and associated record retention, TCM has engaged a third-party service provider to manage such aspects of the Adviser's proxy voting obligations. For more information concerning the tasks performed by the third-party service provider (ior "Proxy Support Vendor"), including retention of the Adviser's proxy voting records, please consult with the designated representative of Proxy Support Vendor.

Procedure

Guidelines. The following guidelines will serve as parameters for the CEO in rendering a proxy vote and, in particular, viewing proposals and recommendations from management in a favorable demeanor in comparison to their counterparts who do not exhibit such tendencies:

- **Accountability.** Corporate Boards should be accountable to shareholders, the owners of the companies, by holding regular board elections, by providing sufficient information for shareholders to be able to assess directors and board composition, and by providing shareholders with the ability to remove directors. Directors should respond to investor input such as that expressed through vote results on management and shareholder proposals and other shareholder communications. Shareholders should have meaningful rights on structural provisions, such as approval of or amendments to the corporate governing documents and a vote on takeover defenses. As an example, the Adviser will generally vote against proposals that cause board members to become entrenched or cause unequal voting rights.
- **Stewardship.** A company's governance, social, and environmental practices should meet or exceed the standards of its market regulations and general practices and should take into account relevant factors that may impact significantly the company's long-term value creation. Issuers and investors should recognize constructive engagement as both a right and responsibility. As an example, the Adviser will generally vote in favor of routine corporate housekeeping proposals such as the election of directors and selection of auditors absent conflicts of interest raised by an auditor's non-audit services.
- **Independence.** Boards should be sufficiently independent so as to ensure that they are able and motivated to effectively supervise management's performance and remuneration, for the benefit of all shareholders. Boards should include an effective independent leadership position and sufficiently independent committees that focus on key governance concerns such as audit, compensation, and the selection and evaluation of directors. The Adviser, for example, will tend to vote against a corporation's board of directors or "management" proposal should it include, among others, excessive compensation, unusual management stock options, preferential voting and poison pills.
- **Transparency.** Companies should provide sufficient and timely information that enables shareholders to understand key issues, make informed vote decisions, and effectively engage with companies on substantive matters that impact shareholders' long-term interests in the company. In reviewing such proposals, the Adviser will further consider the opinion of management and the effect on management, and the effect on shareholder value and the issuer's business practices.

Voting Ballots and Records. The proxy voting practice itself is initiated at such time the company (or issuer) disseminates the proxy voting ballot ("Ballot"). Once proxy material has been received, it is promptly reviewed by the CEO (in the capacity of a CIO or PM) and the issues presented are then evaluated. In most instances, the CEO or designee receives the Ballot from the company electronically with a request to log into a secured website at which point the proxy voting proposals (e.g., Board elections, corporate governance matters, ratification of an independent registered public accounting firm, etc.) will appear for consideration. The Ballot typically contains voting selections as follows: "For" (in which a vote cast will support the measure), "Against" (in which a vote cast will oppose the measure), and "Abstain (in which no vote is cast). The CEO or designee will complete the Ballot and submit it to the company or issuer electronically. Prior to logging out of the website, the CEO will print a PDF version of the screen showing the measures voted upon and the votes recorded. Next, the CEO or designee will email the PDF attachment to the CCO who, in turn, will update the "Proxy Voting Log" (or "Log") with the requisite information on a periodic basis as part of the Brokerage Committee's retrospective review duties.

Disclosure/Client Requests for Information. TCM will provide conspicuously displayed information in its Disclosure Document and website (i.e., for the adviser) summarizing this proxy voting policy and procedures, including a statement that clients may request information regarding how TCM voted a client's proxies, and that clients may request a copy of these policies and procedures. Upon receiving such requests, the CCO shall forward the most current version of the Proxy Voting Policy herein and Proxy Voting Log via email or regular mail to the requestor. The requestor shall receive the proxy voting information free of charge, which also should be disclosed on the website and disclosure documents.

Conflicts of Interest. TCM and, more specifically the CEO (in the capacity of a CIO/PM) will identify any conflicts that exist between the interests of the Adviser and the client by reviewing the relationship of TCM with the issuer of each security to determine if TCM or any of its Supervised Persons has any financial, business or personal relationship with the issuer. If a material conflict of interest exists, the CEO or designee will request that the CCO to advise whether it is appropriate to disclose the conflict to the affected clients, to give the clients an opportunity to vote the proxies themselves, or to address the voting issue through other objective means, such as, voting in a manner consistent with a predetermined voting guidelines (see above) or receiving an independent third party voting recommendation. TCM will maintain a record of the voting resolution of any conflict of interest in the aforementioned Proxy Voting Log.

Recordkeeping. TCM shall retain the following proxy voting records in a format and retention period as set forth in the Recordkeeping guidelines set forth in this Manual:

- These policies and procedures and any amendments thereto;
- Each proxy statement (which shall be maintained on the Adviser’s website or alternatively the Adviser’s website shall include instructions for investors to obtain the proxy voting records)
- Proxy Analysis Report, if applicable;
- Record of each vote cast or abstention (or “Ballot”) in a manner prescribed by the Proxy Voting Form (see below). The CEO will direct the vote of proxies (including corporate actions and class action lawsuits) for which TCM is the primary investment adviser. In such instances, the CEO or designee shall enter the information required to complete the Proxy Voting Form which, too, will be used to memorialize proxy voting records in accordance with the Advisers Act;
- Documentation, if any, created that was material to making a decision how to vote proxies, or that memorializes that decision including periodic reports to the CCO, if applicable.
- Clerical or administrative records generated on behalf of the Adviser by the Proxy Support Vendor.
- Form N-PX (if not maintained by the Trust/Trust CCO)

EXHIBIT C

NOMINATING AND CORPORATE GOVERNANCE COMMITTEE CHARTER ETF OPPORTUNITIES TRUST

Nominating and Corporate Governance Committee Membership

1. The Nominating and Corporate Governance Committee of ETF Opportunities Trust (the “Trust”) shall be composed entirely of Independent Trustees.

Board Nominations and Functions

1. The Committee shall make nominations for Trustee membership on the Board of Trustees, including the Independent Trustees. The Committee shall evaluate candidates’ qualifications for Board membership and their independence from the investment advisers to the Trust’s series portfolios and the Trust’s other principal service providers. Persons selected as Independent Trustees must not be an “interested person” as that term is defined in the Investment Company Act of 1940, nor shall Independent Trustees have any affiliations or associations that shall preclude them from voting as an Independent Trustee on matters involving approvals and continuations of Rule 12b-1 Plans, Investment Advisory Agreements and such other standards as the Committee shall deem appropriate. The Committee shall also consider the effect of any relationships beyond those delineated in the 1940 Act that might impair independence, *e.g.*, business, financial or family relationships with managers or service providers. See Appendix A for Procedures with Respect to Nominees to the Board.
2. The Committee shall periodically review Board governance procedures and shall recommend any appropriate changes to the full Board of Trustees.
3. The Committee shall periodically review the composition of the Board of Trustees to determine whether it may be appropriate to add individuals with different backgrounds or skill sets from those already on the Board.
4. The Committee shall periodically review trustee compensation and shall recommend any appropriate changes to the Independent Trustees as a group.

Committee Nominations and Functions

1. The Committee shall make nominations for membership on all committees and shall review committee assignments at least annually.
2. The Committee shall review, as necessary, the responsibilities of any committees of the Board, whether there is a continuing need for each committee, whether there is a need for additional committees of the Board, and whether committees should be combined or reorganized. The Committee shall make recommendations for any such action to the full Board.

Other Powers and Responsibilities

1. The Committee shall have the resources and authority appropriate to discharge its responsibilities, including authority to retain special counsel and other experts or consultants at the expense of the Trust.
2. The Committee shall review this Charter at least annually and recommend any changes to the full Board of Trustees.

Adopted: December 4, 2019

**APPENDIX A TO THE NOMINATING AND CORPORATE GOVERNANCE
COMMITTEE CHARTER**

ETF OPPORTUNITIES TRUST

PROCEDURES WITH RESPECT TO NOMINEES TO THE BOARD

- I. *Identification of Candidates.* When a vacancy on the Board of Trustees exists or is anticipated, and such vacancy is to be filled by an Independent Trustee, the Nominating and Corporate Governance Committee shall identify candidates by obtaining referrals from such sources as it may deem appropriate, which may include current Trustees, management of the Trust, counsel and other advisors to the Trustees, and shareholders of the Trust who submit recommendations in accordance with these procedures. In no event shall the Nominating and Corporate Governance Committee consider as a candidate to fill any such vacancy an individual recommended by any investment adviser of any series portfolio of the Trust, unless the Nominating and Corporate Governance Committee has invited management to make such a recommendation.

- II. *Shareholder Candidates.* The Nominating and Corporate Governance Committee shall, when identifying candidates for the position of Independent Trustee, consider any such candidate recommended by a shareholder if such recommendation contains: (i) sufficient background information concerning the candidate, including evidence the candidate is willing to serve as an Independent Trustee if selected for the position; and (ii) is received in a sufficiently timely manner as determined by the Nominating and Corporate Governance Committee in its discretion. Shareholders shall be directed to address any such recommendations in writing to the attention of the Nominating and Corporate Governance Committee, c/o the Secretary of the Trust. The Secretary shall retain copies of any shareholder recommendations which meet the foregoing requirements for a period of not more than 12 months following receipt. The Secretary shall have no obligation to acknowledge receipt of any shareholder recommendations.

- III. *Evaluation of Candidates.* In evaluating a candidate for a position on the Board of Trustees, including any candidate recommended by shareholders of the Trust, the Nominating and Corporate Governance Committee shall consider the following: (i) the candidate's knowledge in matters relating to the mutual fund industry; (ii) any experience possessed by the candidate as a director or senior officer of public companies; (iii) the candidate's educational background; (iv) the candidate's reputation for high ethical standards and professional integrity; (v) any specific financial, technical or other expertise possessed by the candidate, and the extent to which such expertise would complement the Board's existing mix of skills, core competencies and qualifications; (vi) the candidate's perceived ability to contribute to the ongoing functions of the Board, including the candidate's ability and commitment to attend meetings regularly and work collaboratively with other members of the Board; (vii) the candidate's ability to qualify as an Independent Trustee and any other actual or potential conflicts of interest involving the candidate and the Trust; and (viii) such other factors as the Nominating and Corporate Governance Committee determines to be relevant in light of the existing composition of the Board and any anticipated vacancies. Prior to making a final recommendation to the Board, the Nominating and Corporate Governance Committee shall conduct personal interviews with those candidates it concludes are the most qualified candidates.
